TO SUM UP:

Automation of libraries is fast coming trend that prevails in the society. Many new networking systems are made for the speedy recovery and easy retrieval. The developed systems and trends that arise in the Information technology has its own impact on the library field also.

Many library packages are available in the market they have many specialised functions within them. They have maintain features such as Speedy Access, Improved services, Easy Retrieval and so on. In the market many Software Packages are available both in Indian and Internation levels. It is the duty of the Librarian to select the apt Library Software Package for the library. He has to look into the details like the Library holdings, User Requirements, Environment, User's Needs. Librarians are confined with the available system configurations and manual power. More than that Librarian has to create the Awareness among the user's about the Software Packages.
