ACKNOWLEDGEMENT

I am indeed very much privileged for having been assigned the topic entitled 'Degradation of Forests in Lunglei District, Mizoram'. Since any kind of research work is not an easy task, I admit that it is the help and guidance of the Almighty God that has made my research possible. Neither words can express nor can deeds return all the blessing I have been nourished with in my life. Thanks to God.

I express my deep gratitude to my supervisor Zahid Husain Qureshi for his uncountable valuable guidance and keen interest throughout the course of my research work. I am very grateful for his intelligent and logical approaches as well as his constant encouragement without which my research work would not have been completed.

I am indeed very thankful to Mr. C.Ramhluna CCF and Mr. Lalnunsanga Khawlhring ACF, for their generous responses for providing data and other information required for my research work.

I am most grateful to my friend Mr. H.Laldinmawia Research Scholar, for lending me his computer whenever I need to use it. My heartiest gratitude to Mr. G.Rosangkima Research Scholar for helping me in the computer works whenever I needed in technical help. I am also grateful to the Mizoram Scholarship Board Government of Mizoram for granting me the very much required fellowship for my research.

I cannot express my gratitude or describe in words the love and support of my parents, for their inspiration, financial support and unceasing prayers that helped me through all thick and thin of life’s journey. Their insight vision of life and selfless sacrifices has made me what I am today. I hope that all their wishes for my career will be materialised through this work.
