

## CONTENTS

Introduction	1
Review of literature	8
<u>Chapter - I</u>	
Performance variation of wild and pond-reared broodstock - Biochemical analysis	22
<u>Chapter - II</u>	
Influence of enriched <i>Artemia</i> biomass supplement on maturation performance	41
<u>Chapter - III</u>	
<i>Spirulina</i> as a carotenoid source in broodstock diet for pigment deficiency correction	52
<u>Chapter - IV</u>	
Maturation induction using prostaglandin and steroids	66
<u>Chapter - V</u>	
Control of <i>Vibrio</i> in maturation and larval tanks using green alga <i>Tetraselmis suecica</i>	79
<u>Chapter - VI</u>	
Effects of ammonia and nitrite on larval survival	94
<u>Chapter - VII</u>	
Impact of microalgal HUFA content on larval HUFA composition and performance	107
<u>Chapter - VIII</u>	
Replacement of living microalgae diet with spray-dried algae	121

## Chapter - IX

Use of enriched rotifers as a replacement for <i>Artemia</i> in larval feed regime	140
--	-----

## Chapter - X

Assessment of a commercial probiotic in larval rearing tanks	163
--	-----

## Chapter - XI

Isolation, characterisation and mass culture of putative probiotic bacteria- effects of inoculation in larval tanks	178
---	-----

## Chapter - XII

Effect of immunostimulants on larval growth, survival and disease resistance	193
--	-----

## Chapter - XIII

Evaluation of biological diets for postlarvae using RNA/DNA ratio as nutritional status indicator	210
---	-----

Summary	224
---------	-----

References	231
