CHAPTER 3
SYNTHESIS OF CERTAIN CONDUCTING POLYPYRROLES
AND STUDY OF THEIR DC CONDUCTIVITY

3.1. Introduction
3.2. Experimental set-up for conductivity measurements
3.2.1. Four point probe method
3.2.2. Two probe method
3.3. Conductivity cell
3.4. Keithly electrometer
3.5. Work included in this chapter

Section A
3.6. Electrochemical synthesis of conducting polypyrrole films using ammonium molybdate and traces of sulphuric acid as electrolyte and study of their DC conductivity
3.6.1. Introduction
3.6.2. Experimental details
3.6.3. Measurement of electrical conductivity
3.6.4. Results and discussion
3.6.5. Effect of the treatment of PPy(MoO₄)²⁻ films with aqueous sodium hydroxide solution on their electrical conductivity
3.6.6. Effect of alternate treatment with base and acid on conductivity

Section B
3.7. Electrochemical synthesis of polypyrrole films using molybdic acid as an electrolyte and investigation of their DC conductivity
3.7.1. Introduction
3.7.2. Experimental
3.7.3. DC conductivity measurements
3.7.4. Results and discussion
3.7.5. Effect of the treatment of PPy(MoO₄)²⁻ films with aqueous sodium hydroxide solution on their electrical conductivity
3.7.6. Effect of alternate treatment with base and acid on conductivity

Section C
3.8. Electrochemical synthesis of polypyrrole films using molybdic acid as an electrolyte and investigation of their DC conductivity
3.8.1. Introduction
3.8.2. Experimental
3.8.3. Results and discussion
3.8.4. Effect of the treatment of PPy(MoO₄)²⁻ films with aqueous sodium hydroxide solution on their electrical conductivity
3.8.5. Effect of alternate treatment with base and acid on conductivity

Section D

3.9. Chemical polymerization of pyrrole using orthophosphoric acid and investigation of DC conductivity of polypyrrole films
3.9.1. Introduction
3.9.2. Experimental details
3.9.3. Results and discussion

Section E

3.10. Preparation of characterization of a chemically prepared polypyrrole powder, soluble in acetone, an organic solvent
3.10.1. Introduction
3.10.2. Experimental details
3.10.3. DC conductivity studies
3.10.4. Results and discussion

Conclusion

References

CHAPTER 4
INFRARED SPECTROSCOPY STUDIES

4.1. General Introduction
4.2. IR spectroscopy of polymers
4.3. Interpretation of spectra
4.3.1. Hetero aromatic compounds
4.3.2. C-H stretching vibrations
4.3.3. N-H stretching vibrations
4.3.4. Ring stretching vibrations
4.3.5. C-H out-of-plane bending
4.4. Work included in this chapter
4.5. Experimental details
4.6. Results and discussion
4.6.1. Infrared spectra of PPy(MoO₄)²⁻ films prepared electrochemically using aqueous solution of ammonium molybdate and trace at H₂SO₄ as the electrolyte
4.6.2. Infrared spectra of PPy(MoO₄)²⁻ films prepared electrochemically using aqueous solution of molybdc as the electrolyte
4.6.3. Infrared spectra of PPy(PO₄)³⁻ films prepared electrochemically using aqueous solution of orthophosphoric acid as the electrolyte
4.6.4. FTIR spectra of PPy(PO₄)³⁻ films prepared chemically using orthophosphoric acid in acetonitrile as the oxident
4.6.5. FTIR spectra of PPy(P0$_4^-$) powder prepared chemically using orthophosphoric acid in acetone as the oxidant

Conclusion

CHAPTER 5 ULTRAVIOLET-VISIBLE SPECTROSCOPY STUDIES

5.1. Introduction
5.2. Experimental
5.3. Results and discussion
Conclusion
References

CHAPTER 6 CYCLIC VOLTAMMETRIC STUDIES

6.1. Introduction
6.2. Experimental procedure
6.3. Pretreatment of platinum electrode
6.4. Cyclic voltammogram studies of PPy(MoO$_4^{2-}$) films using an aqueous solution of ammonium molybdate and H$_2$SO$_4$ as the electrolyte
6.5. Cyclic voltammogram studies of PPy(MoO$_4^{2-}$) films using an aqueous solution of molybdic acid as the electrolyte
6.6. Cyclic voltammogram studies of PPy(P0$_4^-$) films using an aqueous solution of orthophosphoric acid as the electrolyte
Conclusion
References

CHAPTER 7 ULTRASONIC STUDIES IN POLYPYRROLE SAMPLES

7.1. Introduction
7.2. Ultrasonic studies in polymers
7.3. Ultrasonic velocity measurement methods
7.3.1. Pulse-echo-overlap (PEO) method
7.3.2. Pulse-echo-overlap system
7.4. Work done in the present study
7.5. Experimental details
7.6. Results and discussion
Conclusion
References

CHAPTER 8 THERMOGRAVIMETRY, DIFFERENTIAL THERMAL ANALYSIS AND X-RAY STUDIES IN SOME POLYPYRROLE SAMPLES

8.1. Introduction
8.2. Experimental
8.3. Results and discussion
Conclusion
References
