LIST OF FIGURES

Fig 4.1 Comparison of the behavioural profile of preschoolers 142
Fig. 4.2 Comparison of the two categories of behavioural profile of preschoolers 143
Fig. 4.3 Comparison of the creativity of preschoolers 150
Fig. 4.4 Comparison of the problem solving ability of preschoolers 155
Fig. 4.5 Comparison of the social cognition of preschoolers 160
Fig. 4.6 Comparison of impact of study variables on playschool environment 164
Fig. 4.7 Effect of gender on behavioural profile 167
Fig. 4.8 Effect of gender on two categories of behavioural profile 167
Fig. 4.9 Effect of gender on creativity 169
Fig. 4.10 Effect of gender on problem solving ability 171
Fig. 4.11 Effect of gender on social cognition 172
Fig. 4.12 Pattern of the influence of each aspect to the total score for reaction pattern for the different study groups 177
Fig. 4.13 Pattern of influence of each aspect to the total score for intensity of reaction for the different study groups 181
Fig. 4.14 Pattern of the influence of each tested aspect to the total score for verbal creativity for the different study groups 184
Fig. 4.15 Pattern of the influence of each tested aspect to the total score for non-verbal creativity for the different study groups 187
Fig. 4.16 Pattern of the influence of each aspect to the total score for problem solving ability for the different study groups 190
Fig. 4.17 Pattern of the influence of each aspect to the total score for social cognition for the different study groups 195
Fig. 4.18 Flow chart depicting the interrelationship among the study variables 197
Fig. 4.19 Flow chart depicting the differential ecological background of preschoolers who had attended and those who had not attended playschool 245
