ACKNOWLEDGEMENT

‘I will sing of the mercies of the Lord forever’ (Ps 89:1)

‘Gratitude is the mother of all virtues.’

First and foremost I thank and praise God the Almighty for guiding me all along the path of my life and affirming me ‘I am with you always’.

It is my pride privilege to express my sincere thanks and deep sense of gratitude to my guide Dr. Sr. Rosakutty P. J., Associate Professor, Research Department of Botany, Holy Cross College (Autonomous), Nagercoil, for her invaluable guidance, impressive supervision and constant assistance through which this work has been taken the shape in which it has been presented. It was her timely discussion and endless endeavours through which I have gained a lot. Her continuous encouragement and caring attitude has always been a moral support for me.

I am grateful to Sr. Pushpam Iruthayam and Sr. Hilda who gave this opportunity to pursue my Doctoral studies.

I thank my superiors and the management of Holy Cross College, Nagercoil (Autonomous) for permitting me to pursue and complete the research work and to avail myself for the use of the laboratory and library facilities in the college.

I am profoundly grateful to my teachers in the department of Botany and the staff of the department of Biotechnology for their support during the course of this study.

I record my special thanks to Rev. Dr. Fr. John Peter Arulanantham who gave the permission to use all required equipments and the necessary materials to complete
the task and also for his directions and support. I offer my sincere thanks to Mr. Gandhi Kumar who assisted me in the lab.

I am highly indebted to Dr. Wilson for his valuable suggestion, encouragement and support throughout the research work.

My profound gratitude to Rev. Fr. Dr. John De Britto, Director of Rabinet Herbarium, St. Joseph College (Autonomous), Tiruchirapally for his constructive comments on the thesis.

I express my heartfull gratitude to Mrs. Catherine Rose who did the proof reading of the manuscript.

I thank my sisters in the communities of Nagercoil and Tuticorin for helping me by their prayerful support, concern and care in various ways. Also I gratefully acknowledge with delight, the constant encouragement and prayerful support I received from my companions, sisters of Holy Cross Family, my family members and friends who stood by me through thick and thin to speed me along in my effort to complete my research.

My field of study was made less obstacle ridden because of the presence of few individuals who have willingly shared their precious time during the field trips.

Once again I humbly bow in gratitude to the Good Lord for showering His abundant graces on me and for granting me the wisdom, knowledge, understanding, health and strength to undertake this research task and enabling me to complet it.

All may not have been mentioned by name but none is forgotten. I devote my feelings of gratitude to all who remain unnamed.

P. Leema Rose
