ACKNOWLEDGEMENTS

I am very much grateful to Dr. K. Nandakumar, Lecturer, School of pure & Applied physics, Mahatma Gandhi University, under whose guidance, the present work was carried out. I am indebted to him for his keen interest and constant encouragement throughout the course of the work. I express my deep sense of gratitude to him for initiating me into the field of research.

I am indebted to Prof. M. A. Ittyachen, Director, School of Pure & Applied Physics, Mahatma Gandhi University, for providing me the basic facilities to carry out this work and for his competent advice and encouragement throughout the course of my research work. I am highly grateful to him under whose able and competent guidance the work has been carried out, while Dr. K. Nandakumar was on leave.

I also thank all the teaching staff an non-teaching staff of Physics department, Mahatma Gandhi University for their help and cooperation.

I owe my sincere thanks to Prof. Jacob Philip, Department of Instrumentation, Cochin University, for his constant advice and suggestions at time of need during the course of research work and also for extending laboratory facilities for carrying out part of this work. I express my regards to him for introducing me in to various aspects of research and for his deep knowledge and sincere interest in academic, as well as personal matters.

I would like to express my sincere thanks to several of my colleagues Mr. Krishnadas E. Gopakumar, P. Santhosh Kumar, Narayanan Unni, Ajith Kumar G., Cyriac Joseph, Biju P R, Anil Kumar C. P, Vijay P. S. Bubbly K. Joseph, Sindhu A. Kartha, Jigan J. Shajo Sebastian, Joshy Jose, Sankaranarayanan Potty, Jijo John, Jin Jose, Isaac Paul, Sreelatha, Antu Elizabeth, Annie Roshan, Leesai type, Vinoy Thoams, Rajesh R, Bimi, research Scholars, School, of Pure & Applied Physics, for their whole hearted support and co-operation. My thank are also due to the M Sc. Students, School of Pure & Applied Physics, Mahatma Gandhi University for their cooperation and well wishes.

I am thankful to Dr. Ravi Kumar, Scientist, Nuclear Science Center, New Delhi, who is our collaborator, for his valuable help and encouragement for completing part of this work. I am obliged to Prof. P.R.S. Pillai, Department of Electronics, CUSAT, for extending laboratory facilities for this work.

I am thankful to Dr. N. C. Mehra, Scientist, USIC and P. Padmanashan, Geology department, Delhi University for their valuable help during this research work.

I also gratefully acknowledge the financial support provided by Nuclear Science Center, New Delhi, in the form of research grants and fellowships.

The encouragement, understanding and continuing support and love of my parents and my family members helped me endure the pains of completing this work.

Jaimon Yohannan
