### Chapter 1

**INTRODUCTION**  
1.0 Background of the Problem  
1.1 The Present Study—A Preview  
1.2 Scope of the Study  
1.3 Aim of the Study  
1.4 Objectives of the Study  
1.5 The Areas of the Study—The Concepts Defined  
1.5.1 Baby  
1.5.2 Baby Care  
1.5.3 Fathers' Involvement in Baby Care  
1.5.4 Behavioural Profile or Temperament  
1.5.5 Attachment Patterns  
1.5.6 Mothers' Behaviour Patterns  
1.5.7 Caregiver  
1.5.8 Type of Family  
(a) Joint family  
(b) Nuclear family  
1.5.9 Working Mother  
1.5.10 Non-working Mother  
1.5.11 Age Groups  
1.5.12 Sex of the Infant  
1.5.13 Educational Status of Parents  
1.5.14 Income  
1.5.15 Ordinal Position  
1.5.16 Gap between Marriage and Birth of the Child under Study  
1.5.17 Gap between the Child and the Younger or Older Sibling  
1.5.18 Nature of Infant Care Provided  
1.6 Hypothesis

### Chapter 2

**REVIEW OF RELATED LITERATURE**  
2.1 Infancy  
2.1.1 Definition  
2.1.2 Characteristics of infancy  
2.1.3 Adjustments of infancy  
2.1.4 Variation in the patterns of infant care over the different years  
2.1.5 Evaluation of literature and position of the present study
2.2 Fathers’ Involvement in Baby Care
2.2.1 Old and new concepts of parental roles
2.2.2 Modern father
2.2.3 Fathers’ role during pregnancy
2.2.4 Fathers’ role in the birth process
2.2.5 Fathers’ role in baby care
2.2.6 Fathers’ role in the process of socialization
2.2.7 Fathers’ role in cognitive development and creativity
2.2.8 Fathers’ role in achievement motivation
2.2.9 Fathers’ role in sex role development
2.2.10 Differential treatment of fathers and mothers towards boys and girls during infancy
2.2.11 Bidirectionality
2.2.12 Evaluation of literature and position of the present study

2.3 Behavioural Profile of Temperament
2.3.1 Definitions
2.3.2 Characteristics of personality
2.3.3 Models of temperament
2.3.4 Studies in early temperamental differences
2.3.5 Factors influencing temperament
  2.3.5.1 Genetic influences on temperament
  2.3.5.2 Environmental influences on temperament
  2.3.5.3 Other influencing factors on temperament
2.3.6 Stability of temperament
2.3.7 Temperament as a predictor of children’s behaviour
  2.3.7.1 Temperament and cognitive performance
  2.3.7.2 Temperament and language development
  2.3.7.3 Temperament and social behaviour
  2.3.7.4 Temperament and development of attachment
2.3.8 Temperament and child rearing—The goodness of fit model
2.3.9 Measuring temperament
2.3.10 Theories of personality
  2.3.10.1 Behaviourist theory
  2.3.10.2 Psychoanalytic theory
2.3.11 Evaluation of literature and position of the present study

2.4 Attachment Patterns of Infants
2.4.1 Definitions
2.4.2 Development of attachment
2.4.3 Onset of attachment
2.4.4 Behaviours that foster attachment
  2.4.4.1 Smiling
  2.4.4.2 Crying
  2.4.4.3 Sucking
  2.4.4.4 Cuddling
  2.4.4.5 Mutual gaze
2.4.5 Patterns of attachment
2.4.6 Measurement of attachment

3.9.3 Interview schedule for assessing infants' behavioural profile
(CharACTERIZED AND STANDARDIZED BY INDEKHA, 1977)

3.9.4 Interview schedule for assessing mothers' behaviour patterns
(CharACTERIZED AND STANDARDIZED BY INDEKHA, 1977)

3.10 Reliability and Validity
3.11 Main Study
3.12 Measurement
3.13 Treatment of the Data
  3.13.1 Simple correlation
  3.13.2 Analysis of variance (ANOVA)
  3.13.3 t-test
  3.13.4 Multiple regression analysis
  3.13.5 Grading of treatment

Chapter 4
RESULTS
Part I Relationship between the Study Variables
Part II Effect of the Independent Variables on the Study Variables
Part III Effect of the Study Variables on Baby's Behavioural Profile
Part IV Effect of Sensitive Period on Attachment Patterns of Infants

Chapter 5
DISCUSSION
Part I Relationship between the Study Variables
  5.1 Relationship between Fathers' Involvement in Baby Care and Baby's
      Behavioural Profile
  5.2 Fathers' Involvement in Baby Care and Reaction Patterns of Infants
  5.3 Relationship between Fathers' Involvement in Baby Care and Intensity
      of Reaction of Infants
  5.4 Relationship between Fathers' Involvement in Baby Care and
      Attachment Patterns of Infants
  5.5 Relationship between Fathers' Involvement in Baby Care and Mothers'
      Behaviour Patterns
  5.6 Relationship between Baby's Behavioural Profile and
      Attachment patterns of Infants
  5.7 Relationship between Baby's Behavioural Profile and Mothers'
      Behaviour Patterns
  5.8 Relationship between Attachment Patterns of Infants and Mothers'
      Behaviour Patterns
  5.9 Relationship between Attachment Patterns of Infants and Reaction
      Patterns of Infants
  5.10 Relationship between Attachment Patterns of Infants and Intensity
      of Reaction of Infants
5.11 Relationship between Mothers' Behaviour Patterns and Reaction Patterns of Infants 216

5.11 Relationship between Mothers' Behaviour Patterns and Intensity of reactions of infants 218

Part II  Effect of Independent Variables on the Study Variables

5.13 Effect of Paternal Age on the Study Variables (a) Fathers' Involvement in Baby Care; (b) Baby's Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers' Behavioural Patterns 220

5.14 Effect of Maternal Age on the Study Variables (a) Fathers' Involvement in Baby Care; (b) Baby's Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers' Behavioural Patterns 222

5.15 Effect of Paternal Educational Status on the Study Variables
(a) Fathers' Involvement in Baby Care; (b) Baby's Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers' Behavioural Patterns 224

5.16 Effect of Maternal Educational Status on the Study Variables
(a) Fathers' Involvement in Baby Care; (b) Baby's Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers' Behavioural Patterns 226

5.17 Effect of Status of Income on the Study Variables
(a) Fathers' Involvement in Baby Care; (b) Baby's Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers' Behavioural Patterns 228

5.18 Effect of Interval between Marriage and Birth of the Child on the Study Variables (a) Fathers’ Involvement in Baby Care; (b) Baby’s Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers’ Behavioural Patterns 230

5.19 Effect of Nature of Infant Care Provided on the Study Variables
(a) Fathers' Involvement in Baby Care; (b) Baby's Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers' Behavioural Patterns 232

5.20 Effect of Gender on the Study Variables
(a) Fathers' Involvement in Baby Care; (b) Baby's Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers' Behavioural Patterns 235

5.21 Effect of Ordinal Position on the Study Variables
(a) Fathers' Involvement in Baby Care; (b) Baby's Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers' Behavioural Patterns 239

5.22 Effect of the Type of Family on the Study Variables
(a) Fathers' Involvement in Baby Care; (b) Baby's Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers' Behavioural Patterns 243

5.23 Effect of Working Status on the Study Variables
(a) Fathers' Involvement in Baby Care; (b) Baby's Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers' Behavioural Patterns 247

5.24 Effect of Interval between the Child and the Younger/Older Child on the Study Variables
(a) Fathers' Involvement in Baby Care; (b) Baby's Behavioural Profile; (c) Attachment Patterns of Infants; and (d) Mothers' Behavioural Patterns 252

Part III

5.25 Effect of the Study Variables on Baby's Behavioural Profile 255

Part IV

5.26 Effect of Sensitive Period on Attachment Patterns of Infants 258
Chapter 6
SUMMARY AND CONCLUSIONS

6.1 The Problem of Investigation
6.2 Aim of the Study
6.3 Hypotheses
6.4 Conceptualisation of Terms
6.5 The Sample
6.6 The Tools
6.7 Collection of Data
6.8 Treatment of the Data
6.9 Results
6.10 Conclusions
6.11 Limitations of the Present Study
6.12 Suggestions for Further Research
6.13 Implications of the Study
