CONTENTS

0 Introduction ........................................... 1

1 Preliminaries ........................................... 6

1.0 Notations ............................................. 6
1.1 $\Gamma$-near rings ..................................... 7
1.2 $\Gamma$-rings ........................................... 14

2 Strongly Regular Gamma - Near Rings ................. 22

2.1 Introduction .......................................... 22
2.2 $\nu$- prime ideals ................................... 23
2.3 Weakly regular $\Gamma$-near rings ....................... 27
2.4 Strongly regular $\Gamma$-near rings ..................... 34

3 Strongly 2-Primal Gamma - Near Rings ................. 49
Table of Contents

3.1 Introduction .............................................. 49
3.2 2-primal $\Gamma$- near rings ............................. 50
3.3 Strongly 2-primal $\Gamma$- near rings .................... 57

4 Strongly Prime Gamma - Near Rings 64
   4.1 Introduction .............................................. 64
   4.2 Strongly prime $\Gamma$- near rings ....................... 65
   4.3 Radicals of strongly prime $\Gamma$- near rings .......... 74
   4.4 Equiprime radicals of $\Gamma$-near rings ............... 77

5 Strongly Equiprime Gamma - Near Rings 80
   5.1 Introduction .............................................. 80
   5.2 Strongly equiprime $\Gamma$-near rings ................... 81
   5.3 Strongly equiprime radicals of $\Gamma$- near rings ...... 90

6 Strongly Prime Gamma Rings and Morita Equivalence of Rings 95
   6.1 Introduction .............................................. 95
   6.2 Prime and semiprime ideals of $\Gamma$-rings ............ 96
   6.3 Semiprime $\Gamma$- rings ................................. 101
   6.4 Strongly prime $\Gamma$-rings ............................. 103
   6.5 Strongly prime radicals ................................. 110

Bibliography .................................................. 115
