LIST OF FIGURES

1.1 - *Aspergillus flavus* on various contaminated sources 3

2.1 - *Achyranthes aspera* L. 17

3.1 - Chromatogram showing different aflatoxins 26

4.1 - Changes in biochemical markers in pretreatment with *A. aspera* root extract, silymarin and aflatoxin 36

4.2 - Changes in biochemical markers in treatment with *A. aspera* root extract, silymarin and aflatoxin. 37

5.1 - Liver of normal rat 44

5.2 - Liver of rat exposed to single dose of 1 mg/Kg aflatoxin 44

5.3 - Liver of rat exposed to *A. aspera* root extract (100 mg/ kg) and AF 1mg/kg 46

5.4 - Liver of rat exposed to *A. aspera* root extract 200 mg/kg and AF 1mg/kg 46

5.5 - Liver of rat exposed to silymarin 25mg/ kg and aflatoxin 1 mg /kg 47

5.6 - Liver of rat exposed to silymarin 50mg/ kg and aflatoxin 1 mg /kg 47

5.7 - Kidney (Cortical part) of control rat 49

5.8 - Kidney (Cortical part) of rat exposed to aflatoxin 1 mg/ kg 50

5.9 - Kidney (Cortical part) of rat exposed to *A. aspera* root extract 100 mg/ kg and aflatoxin 1 mg/ kg. 50

5.10 - Kidney (Cortical part) of rat exposed to *A. aspera* root extract 200 mg/kg and aflatoxin 1 mg/ kg. 51

5.11 - Kidney (Cortical part) of rat exposed to silymarin 25 mg/ kg and aflatoxin 1 mg/ kg. 51

5.12 - Kidney (Cortical part) of rat exposed to silymarin 50 mg/ kg and aflatoxin1 mg/ kg. 52

6.1 - Alterations in serum enzymes activities. 72
6.2 - Alterations in liver enzyme activities.

6.3 - Alterations in lipid peroxidation and anti-oxidant enzymes.

6.4 - Non-enzymatic antioxidant status in the liver of rats treated with *A.aspera* and aflatoxin.

7.1 - Levels of glutathione in blood in rats treated with aflatoxin, *A.aspera* & silymarin.

7.2 - Levels of GR, GPx, GST, SOD & CAT.

8.1 - Serum biochemical values of aflatoxin intoxicated rats.

8.2 - Changes in haematological parameters in aflatoxin intoxicated rats.

8.3 - Differential blood cell counts of rats fed on 2.5mg aflatoxin/kg.
