ACKNOWLEDGEMENT

Gratitude takes three forms “a feeling from the heart, an expression in the words and a giving in return”. First of all, I kneel in utter subservience before God who gave me the requisite potential and diligence for the successful accomplishment of this task.

Foremost, my debt of gratitude must go to my advisor, Dr. Sunil Puri, Professor of Botany, Dept. of Basic Sciences. His continuous support, sustained encouragement, sincere advice, immense knowledge and fatherly attitude has enabled me to keep going, put this tireless venture to fruitful results and this dissertation worthy of presentation which will remain a part of my memory forever.

I acknowledge my heartiest thanks to my loving son, Prakrit who is the ever replenishing source of inspiration, strength and encouragement during this period. Last but not the least I offer my sincere thanks and profound admiration to my affectionate parents, sisters and brother, Late father-in-law, mother-in-law, who are the source of encouragement for me, infact this work became possible only because of their love, moral support and prayers for my success.

All may not be mentioned but none is forgotten. Needless to say, errors and omissions if any are mine.
