Acknowledgments

All praise is to Almighty Allah, most gracious, most merciful who says in the Holy Quran:

(شُهِّدَ اللَّهُ أَنَّهُ لَا إِلَهِ إِلَّا هُوَ وَالملائِكَةُ وَأَوْلُو الْعَالَمِ قَانِمَا بِالْقُسْطِ)

And the creator of the universe, who has enabled me to complete this research work successfully. A lot of thanks are to Him who bestows the mankind by the guidance of Prophet Mohammed (peace be upon him) who is forever a torch of guidance and knowledge for the mankind. He says

(مَن سَلَكَ طَرِيقًا يَلُمَّسَ فِيهِ عَلَمًا سَهِيلًا وَهُوَ طَرِيقًا إِلَى الْجَنَّةِ)

After thanking Allah (exaltation and glory be to Him) for helping me finish this Thesis, I would like to thank mother-like guide, Dr. Alveera Mehdi, Associate Professor, Department of Mathematics, Aligarh Muslim University, Aligarh, who has wrapped me up with a mother’s kindness, a teacher’s advice, and a guide’s support. Admittedly, I might not get my Ph.D. but for her. She, therefore, deserves all my true feelings of love and appreciation.

I also express my greatest sense of gratitude and reverence to the ever-flowing spring, a paragon of bestowal and destination of the needy, Prof. Fazal Mehdi, Department of Mathematics, Aligarh Muslim University, Aligarh, with whom I have found the father’s protection and strength of the guide

I shall not forget herein to mention, with esteem and respect, the embodiment of elevated responsibility, big heart, and bright smile,
Prof. P.K. Abdul Azis, the university Vice-Chancellor, whose sense of duty towards students of the university, in general, and the foreigners, in particular, nobody can deny.

I express all feelings of appreciation to the chairman of the Department of Mathematics, Prof. Afzal Beg, the ex-chairman of the department, Prof. Huzoorul Hasnain Khan, and Prof. Mohammed Zubair Khan, for all their help.

I highly appreciate sincere counseling and advices of Dr. Subuhi Khan that have always been bright candles dissipating darkness off my way.

It is my pleasure and honor to thank mathematics teachers especially Dr. Kalimuddin Ahmad, International Student advisor and Dr. Kaleem Raza Kazmi, Department of Mathematics for their assistance.

My thanks to the U.G.C. for supporting me during my work as well as to all office staff in Department of Mathematics who have helped me with their inspiring smiles and faithful prayers that every foreign student needs.

My sincere thanks is due to my colleagues especially Mr. Fahad Sikandar., Mr. Muzibur Rahman Mozumder., Mrs Firdhousi Begum. and Mr. Ayazul Hasan for helping me.

I must not forget here, too, those unknown soldiers, whose kindness and love have created a blessing heaven for me, and who never spare an effort or time to support me: Dr. Sumaia Al-Mekhlafi, my younger sister who is an epitome of self-sacrifice, who
is more than my daughter, has been the biggest moral support to me during these years. It will be right to say that it is due to her that my research became possible and easy. I have no words to express my gratitude and thanks to her, what she did for me in the last two years and Mr. Abdullah Talha, my life-partner, who has endured patiently my nervous moments and working involvements. He has been always with me with his strong support in my own life as well as in academic life.

A lot of warmth and affection to my dear kids, Ahmed and Wala who have been deprived of care and concern during my research work.

I take this opportunity to express my deepest gratitude to Plenipotentiary Minister in the Yemen Embassy- New Delhi, Mr. Mohammed Othman Al-Mekhlafi for his constant encouragement and moral support.

I feel grateful to the Cultural Attaché in the Yemeni Embassy-New Delhi, Prof. Abdullah A. Ba-Issa, his assistants and working staff who have given me more than what they have to.

I am also thankful to all my teachers who taught me from childhood till the completion of this research work.

I owe my deepest regard and thanks to Miss Sameera, Amin who always remains supportive to me in Yemen. She is really a special friend in my life to whom I can never pay back what she has done for me.
Also my deep heartiest thanks goes to special persons, my brothers, (Dr. Maki, Khaled, Ahmed) and my sisters (Dr. Naseem, Dr. Yasmeen, Dr. Asma). I thank them for their love, affection, trust and support through my life.

I thank each and every one who has helped me at some stage or the other in making this thesis possible.

Last but not the least none of this would have been possible without the constant support and encouragement of my parents; my father, who is a symbol of hard work and patience for me and my mother, an utmost inspiration and a candle of hope in all dark situations of my life, who has a dream to see me as Dr. Sabah. My pen and tongue fall short of expressing a word of thanks to those who have suffered bitterly from the separation that kept me apart from them, my beloved parents, who, though absent from sight, are always present in heart.

Sabah Abdul Rahman Khaled Naji
