Pursuing a PhD is like an odyssey, a seemingly long journey to a destination. And finally the time has arrived to look back on silhouettes of memories and to recall all those with whom I interacted and shared ups and downs of my research work. Without their guidance and support this endeavor, a unique learning raga, would not have been possible. It has been an experience of a voyage through varied terrain that has often been disheartening, excruciating and mundane though there have been times of exhilaration and satisfaction.

A billion thanks to ALLAH who gave me strength and enabled me to complete this thesis work. I pray earnestly to HIM to help and guide me always in all my future endeavors.

I take this opportunity to express my sincere and profound gratitude to my supervisor Dr. Rizwan Hasan Khan, Interdisciplinary Biotechnology Unit, AMU for his immensely valuable suggestions and constant encouragement throughout the study. My association with him also taught me to appreciate the value of patience, sustained efforts and humility in the development of healthy scientific temperament.

I would like to acknowledge the invaluable contribution of Prof. M. Saleemuddin as my teacher and coordinator of our unit, for providing necessary facilities and help.

I express my sincere thanks to my teachers, Dr. Asadullah Khan, Dr. M. Owais and Dr. Hina Younus for their encouragement and help. I also thank Mr. Lal Mohd. Khan, Mr. Syed Faisal Maqbool, Mr. Aqtedar Husain, Dr. Parveen Salahuddin, Mr. Amir Ali, Mr. Ramesh Chandra, Mr. Islam Khan, Mr. Mohd. Nasir, Mr. Aslam, Mr. Chandra Pal, Mr. Mashkoor, Mr. Rajendra and Mr. Karamveer for their help and cooperation whenever needed.

Words fall short to describe the companionship and cooperation of my friend Hafeeza. We have been with each other for nearly eight years and have spent good and bad times together. I sincerely acknowledge the help and support from my colleague.
Priyankar. Timely support from Mr. Prashant and Mr. Aseem cannot be estimated. My endearments are also due to my previous batchmates Sheeba, Sahar, Medha, Deeba, Deepika, Shazia, Tabrez, Tanweer, Zulfazal, Hamid and Neesar. I had spent memorable moments with them. Special thanks are also due to my colleagues Maroof, Varun, Malik and Nazia. I thank them all for their contribution and their good-natured support. I sincerely wish them all luck for their future life.

I heartily acknowledge the help and cooperation which I received from my juniors Ejaz, Ankita, Javed, Rabbani and Zainab. I sincerely acknowledge the assistance of my seniors Dr. Soghra, Dr. Aabgeena, Dr. Basir, Ms. Farah, Mr. Tashfeen, Dr. Masood, Dr. Faisal, Dr. Arif, Mr. Tehseen, Mr. Akram, Mr. Atif, Ms. Barira, Ms. Iram, Ms. Rubab and Mr. Shehpar for making my stay in IBU a memorable experience.

The financial support in the form of junior and senior research fellowship by CSIR is greatly acknowledged.

I am deeply indebted to my family members whose moral support and affection bolstered me all the way during my studies. It is from them that I learnt care for precision and enthusiasm of life. I appreciate Ammi and Papa from the core of my heart for their understanding and courage and personal guidance during my long stays at lab, that have provided a good basis for the present thesis and life ahead. My special love to all the kids Sana, Asim, Amir, Umar, Usman, Abdullah and new addition Zuha.

Finally, I look upon those researchers whose life and work always motivate me and make me aware of my responsibilities towards making the world a better place to live in.

SADAF FATIMA
