List of Tables
LIST OF TABLES

Table 1: Role of liposomes in various disciplines

Table 2: Liposome-based Antibiotics/Antineoplastics

Table 3: List of Antigens with which liposomes have been used as immunoadjutants

Table 4: Liposome based vaccines either approved or licensed for use in human

Table 5: History of Podophyllotoxins in medicine

Table 6: Antineoplastic activity of etoposide as a single agent

Table 7: Etoposide stability in solution

Table 8: Etoposide pharmacokinetic parameters (Vanderbile data)

Table 9: Variation in etoposide clearance with different routes of administration.

Table 10: Detailed description of structural chromosome changes and mitosis disruption abnormalities.

Table 11: Preventive effect of tuftsin pretreated on CP induces chromosomal aberration.
