

LIST OF TABLES

Table No	List of Tables	Page No.
Table 1.1	Chemical composition and nutritive value of Cabbage	3
Table 1.2	Major diseases of Cabbage	4
Table 3.1.	Screening of different cabbage cultivars for <i>X. campestris</i> pv. <i>campestris</i>	42
Table 3.2.	Biochemical characterization of <i>Xanthomonas campestris</i> pv. <i>campestris</i> .	43
Table 3.3.	Screening of cabbage cultivars for the presence of black rot disease under green house conditions	43
Table 4.1.	List of primers used for the gene expression studies	62
Table 4.2.	Screening of cabbage cultivars for the presence of black rot disease under green house conditions	63
Table 4.3.	List of black rot inducible genes in cabbage obtained from the SSH cDNA library matched upon BLAST analyses with plant genes of known functions.	66
Table 5.1.	Biochemical characterization of different bacterial isolates	86
Table 6.1.	List of Primers used for the gene expression studies	101
Table 6.2.	Effect of <i>Xanthomonas campestris</i> pv. <i>campestris</i> on seed germination and seedling vigor of cabbage	104
Table 6.3.	Effect of seed treatment with <i>P. fluorescens</i> on seed germination and seedling vigor under green house conditions	105
Table 6.4.	Effect of seed treatment with INA on cabbage seed germination and seedling vigor.	106
Table 6.5.	Effect of seed treatment with INA on black rot disease incidence under green house conditions	106
Table 6.6.	Identification of ESTs from the SSH library obtained from the cabbage-susceptible cultivar treated with the <i>P. fluorescens</i>	121
Table 6.7.	List of upregulated ESTs from the cabbage-susceptible cultivar after treatment with the <i>P. fluorescens</i>	122
