LIST OF TABLES

Table 3.1: GA version for different combinations of crossover and mutation

Table 3.2: Parameters used for different problems

Table 3.3: Computational results of 9 different problems for different GA versions

Table 4.1: Comparison of computational results for the three versions of GAs

Table 4.2: Sensitivity analysis of $p_c$ and $p_m$ for GA-2

Table 5.1: Time Table

Table 5.2: Best found objective values

Table 5.3: Best found Schedule

Table 5.4: Sensitivity analyses of $p_{size}$ and $m_{gen}$ on M-1 (where $p_c=0.8$ and $p_m=0.1$)

Table 5.5: Sensitivity analyses of $p_{size}$ and $m_{gen}$ on M-2 (where $p_c=0.8$ and $p_m=0.1$)

Table 5.6: Sensitivity analyses of $p_c$ and $p_m$ on M-1 (where $p_{size}=200$ and $m_{gen}=500$)

Table 5.7: Sensitivity analyses of $p_c$ and $p_m$ on M-2 (where $p_{size}=200$ and $m_{gen}=500$)

Table 5.8: Time Table

Table 5.9: Comparison results of SGA, TGA-4 and TGA-8

Table 5.10: Best found Schedule

Table 5.11: Sensitivity analyses of $p_{size}$ and $m_{gen}$ on SGA, TGA-4 and TGA-8

Table 6.1: Computational results for random problems of Model – I using EGA-1

Table 6.2: Computational results for random problems of Model – I using EGA-2

Table 6.3: Computational results for random problems of Model – I using EGA-3
Table 6.4: Computational results for negatively correlated problems of Model – I using EGA-1

Table 6.5: Computational results for negatively correlated problems of Model – I using EGA-2

Table 6.6: Computational results for negatively correlated problems of Model – I using EGA-3

Table 6.7: Computational results for random problems of Model – II using BMP Technique

Table 6.8: Computational results for random problems of Model – II using PFP Technique

Table 7.1: Computational results of HAGA-ARH for randomly generated interval valued problems

Table 7.2: Comparison of CB-GA, LNB-CGA and HAGA-ARH for some instances of type A to D

Table 8.1: Different GA versions

Table 8.2: Parameters of GGA and LGA

Table 8.3: Computational results of different GA versions for 4 different I-ATSPs
