Acknowledgements

I started my research work under CSIR-JRF fellowship as a full time research scholar under the supervision of professor Prabal Kumar Mallick, in the department of physics of Burdwan University. After the completion of two years as JRF, I worked as a part time scholar and on joining Faculty Improvement Programme (FIP) of UGC, I have been able to finish the required research work.

In my entire research work I got benefited in many aspects from others.

My honorable supervisor Professor Prabal Kumar Mallick not only helped me to carry out the paper works in an elegant way but my scientific understanding was also clarified on discussion with him. When I started my last phase of the work, I had so many queries that I used to hesitate to tell them to my supervisor. It was really a great opportunity for me that sir made me bound to seek the answers. That was the process I have followed to know the subject of my work better. I also pay my earnest respect to the precious suggestions made by him in all respects along the entire length of the work. I must recognize the beautiful teaching imparted by my supervisor with the help of real time examples.

My leave of FIP was of two years and the total period was devoted to performing of experiments, analyses of results, correction of papers as well as writing of the thesis. My little daughter Tithi Ghosh helped me much in formatting the thesis by choosing appropriate colours for the borders and headings. In this prolonged process I also became a debtor to my elder sister
Smt. Shampa Banerjee who inspired me to overcome many difficult situations. I also pay my special thanks to my father-in-law and my husband without the help of whom, I could not be able to finish the job in time. Once I read in the journal of Physics News that any person, may be related with no concerned discipline can also motivate others working in the concerned discipline. In this connection my mother is the one and the only person to be mentioned out. I am also thankful to my departmental colleagues in my college for the extra load carried by themselves in the absence of myself. It will be very offensive if I fail to remember the silent contribution of my husband Santanu Ghosh in helping me to reach the goal of this untiring effort.

Regarding the leave under Faculty Improvement Program of UGC, I would like to pass on my special thanks to:

- University Grants Commission
- Burdwan University
- Dr. Pradip Kr. Dan (Principal of Vivekananda Mahavidyalaya)
- Dr. Monojit Acharya Choudhury (President of G.B. of Vivekananda Mahavidyalaya)
- Smt. Swapna Sen (Burdwan University Nominee)
- Dr. Bishnu Charan Sarkar (Expert, Physics Department, Burdwan University)
- Sri Partha Sarathi Ghosh (Senior Teacher and Head of the Dept. of Physics of Vivekananda College)
- Dr. Pradip Kr. Ghosh (G.B. member, Teacher’s representative)
- Dr. Mina Hati (G.B. member)
- Sri Mrinal Kanti Ghosh
Prof. Budhadeb Ghosh (Ex Head of the Dept. of Physics, Burdwan University)
Prof. Swapan Pradhan (Present Head of the Dept. of Physics, Burdwan University).

I should acknowledge the kind co-operation, imparted by Dr. Manash Ghosh of Indian Association for Cultivation of Science for helping me in recording the Raman spectra. I also express my deep appreciation to my co-workers: Dr. A. K. Dey, Dr. S. Chattopadhyay, Dr. P. Sett, Dr. Joydeep Chowdhury, Dr. Sushil Kumar Sarkar and Dr. Manash Ghosh for their valuable suggestions and contributions.

I would also like to express my obligation to all the predecessors contributed to this emerging field of spectroscopy.

The effort however small it may be, I must honour all the attempts made in this regard.
