CONTENTS

ACKNOWLEDGEMENTS

PREFACE

CHAPTER I : LITERATURE SURVEY ON SCHIFF BASES & SCOPE OF THE STUDY

CHAPTER II : GENERAL PRINCIPLES OF POLAROGRAPHY
Section (i) : Theory and Applications of Polarography
Section (ii) : Reversible electrode reactions of Metal complexes at d.m.e.
- Lingane method
- Deford and Hume method.
Section (iii) : Irreversible electrode reactions of metal complexes at d.m.e.
- Koutecký method
- Meites and Israel method
- Ringbom and Eriksson method

CHAPTER III : PREPARATION AND CHARACTERIZATION OF NEW SCHIFF BASES

CHAPTER IV : POLAROGRAPHIC BEHAVIOUR OF CADMIUM IN PRESENCE OF SIX NEW SCHIFF BASES
Section (i) : Effect of pH on cadmium Schiff base complexes
Section (ii) : Effect of ligand concentration on the wave height
Section (iii) : Effect of height of mercury column
Section (iv) : Effect of metal ion concentration
CHAPTER V : DETERMINATION OF STEP-WISE FORMATION CONSTANTS AND LIGAND NUMBER OF CADMIUM COMPLEXES IN SIX DIFFERENT SCHIFF BASES (Deford and Hume method)

CHAPTER VI : POLAROGRAPHIC INVESTIGATION OF INDIVIDUAL METAL IONS IN PRESENCE OF 3,4,5-TRIMETHOXY BENZALDEHYDE - AMINO METHYL PROpanediol [TMBAMPD]
Section (i) : Effect of pH on the wave height
Section (ii) : Effect of ligand concentration
Section (iii) : Effect of height of mercury column
Section (iv) : Effect of metal ion concentration

CHAPTER VII : COMPLEX STUDY OF REVERSIBLE SYSTEMS (Lingane method)
Section (i) : Evaluation of stability constant and ligand number of lead-TMBAMPD system
Section (ii) : Determination of equilibrium constant and metal-to-ligand ratio of copper-TMBAMPD system.

CHAPTER VIII : COMPLEX STUDY OF IRREVERSIBLE SYSTEMS (Meites and Isreal method)
Section (i) : Computation of kinetic parameters of indium-TMBAMPD system
Section (ii) : Complex study of palladium-TMBAMPD system

CHAPTER IX : SIMULTANEOUS DETERMINATION OF METAL IONS IN BINARY MIXTURES
Section (i) : Estimation of cadmium and copper
Section (ii) : Determination of cadmium and nickel
Section (iii) : Analysis of copper and nickel
