Acknowledgements

This thesis is the culmination of five years of work (2002-2007) at Centre of Bioresources and Biotechnology, TERI University and Centre for Mycorrhizal Research (CMR), TERI.

There are numerous people I wish to thank for contributing to this work. First of all my warmest thank go to Dr Alok Adholeya, Director, Biotechnology and Management of Bioresources Division and Chairman of my advisory committee, who has been a most reliable supervisor, who gave me freedom to do things in my own order and supported and guided me to see important things of research. I also want to sincerely thank him for the innumerable opportunities he offered beyond the domain of my PhD work, which enriched me both personally and professionally.

I wish to express my warm and sincere thanks to Dr R K Pachauri, Chancellor and Dr Vibha Dhawan, Vice-chancellor, TERI University for providing me with infrastructure and other necessary facilities to execute the present study in the well equipped laboratories of TERI.

My sincere thanks to Dr T P Singh, Ex Director, TERI University and Prof. Subhash Chander, Ex Advisor, TERI University. I express my warmest thanks to Gp Capt. (Rtd) Rajiv Seth, Registrar, TERI University for his great help and cooperation.

I sincerely express my gratitude to my SRC members Dr Banwari Lal, Dr Sanjay Saxena and Dr Sunil Pandey for the periodic assessment of my work and their valuable suggestions. Timely help and cooperation from Dr Mahaveer Sharma, Mr Yateendra Joshi, Dr Arvind Seth, Dr MRVP Reddy, Dr Atimanav Gaur, Dr Malati Laxmikumaran, Dr Malini Balakrishnan and all other faculty members of the TERI University during the pre-PhD course work is gratefully acknowledged. I also acknowledge the help of Mr H K Bhandari, Manager, Associated Alcohols and Breweries Limited (Barwaha) for sending the effluent and allowing me to take samples from the industry premises.

I want to thank all former and present colleagues in CMR especially Drs. Reena Singh, Prasun Ray, Pragati Tiwari, Shanuja Beri, Kamlesh Shukla, Ms Seema Jakhmola, Ms Bharati, Mr H S Uppal, Mr Veeranna A Channashettar, Mr S Mahendaran and Mr U Gangi Reddy.

I cannot thank enough Dr Anoop Singh for the help he extended while working on this thesis, manuscripts for my papers and the help with statistical analysis. Thanks are also due to Dr Piyush Malaviya (Jammu University) and Dr Anuj Goel (University of California) for motivating me throughout this endeavor.

I am blessed with wonderful juniors Akhil, Anshul, Susheel, Om Prakash (OP), Aditi and Harshita and very helpful seniors Drs. Dhruba Bhattacharya, Priyangshu M Sarma, Venkatesh Dutta, Pooja Joshi, Mr Krishnan and Ms Shilpanjali Sarma. Dr Prasun Ray who taught me fungal molecular biology is thanked for good guidance.

During this period, the students who worked with me for their masters’ dissertation, Swati Sharma, Peyton Smith, Rajesh Singh, Rakesh Diwedi and Niyati Kalia deserve a special mention for the help they extended. Special word of thank to Vibhu Jain (MILIPORE) who made sure that I always had access to maximum journal papers.
During this period, I met some truly special people who made this sojourn a memorable one. The batch of 2002; Hema, Nirmal, Nitu, Nemika, Nishritha, Ritu, Rajalakshmi, Sangeeta and Sonali will always hold a special place for the bond we forged and the good times we enjoyed together.

I am also grateful to all personnel at Publication Unit, especially Mr R K Joshi, the Computer center, library staff, especially Baldevji, the Purchase section, the Dispatch and Photocopying section and the Electrical division for their services and help they provided which resulted in timely completion of this thesis. Thanks are due to Mr Kamal Sarma and Ms Pratibha for taking care of the administrative obligations with TERI University.

I am also greatly thankful to Mr Devendra Joshi, Mr Het Ram, Mr Ramanjeet, Mr Rajeev, Mr Rambaran, Mr Vinod, Mr Samarjeet, and Mr Shiva for their assistance and support.

I acknowledge the financial support provided by University Grants Commission (UGC), New Delhi in the form of junior and senior research fellowship. Financial support from Department of Biotechnology (DBT) and Indo Swiss collaboration in Biotechnology (ISCB) for my travels to University of Neuchatel, Switzerland and Fifth International Conference on Mycorrhiza (ICOM5), Granada, Spain is duly acknowledged.

Friends outside the lab and family I wish to thank you for just being there. Life in a Metro…like Delhi would not have been any simpler without the support system which I had in the form of Kukreti family. I am forever indebted to Mr K R Kukreti, Auntyji, Amit, Sumit and Suman for providing me a home away from home. At this moment I would like to thank my dear brother Kailash who also acts as my 24x7 technical help for helping me out whenever I asked for. My parents who always acquiesced to all my demands and who have always helped when long periods away from home were causing troubles, deserve my deepest thanks. Thank you for the constant love, affection, moral support and prayers. My in-laws have been a big source of support throughout these years, celebrating every success I had.

To Yamini, the bulwark of my life, no words are enough to express my gratitude and love to you. You have taught me how to do many things simultaneously, yet always keeping the right priorities of life in mind. I am happy to share my life with you. Thanks for all the hours spent in revising those manuscripts even when you were away. You are the best critic I can ever have.

Finally, any omission in this brief acknowledgement does not mean ingratitude.

I conclude by few words from C P Cavafy’s Ithaka

…But do not hurry the journey at all.
Better if it lasts for years,
So you are old by the time you reach the island,
Wealthy with all you have gained on the way,
Not expecting Ithaka to make you rich.

～vi～
