ACKNOWLEDGEMENT

The presentation of this thesis is the end of my journey in obtaining my Ph.D. I have enjoyed travelling on this journey. This thesis has been kept on track and now getting completed with the support and encouragement of numerous people, including my Professors, colleagues, well wishers, friends and various institutions. At the end of my thesis, I would like to thank all those people who made this thesis possible and an unforgettable journey experience for me. It is a pleasant task to express my thanks to all those who contributed in many ways to the success of this study.

Foremost, I would like to express my sincere gratitude to my advisor Dr. Darshana R. Bhatt for the continuous support of my Ph.D. study and research, for her patience, motivation, enthusiasm, and immense knowledge. Her guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my Ph.D. study.

Needless to mention that the inspiration and encouragement rendered to me by Dr. Indrajit N. Patel, Professor of Structural Engineering Department, Birla Vishvakarma Mahavidyalaya, Vidyanagar have adequately helped me to continue my efforts to the far end of success. I express my extreme regards to a reverential person. It is very difficult to express indebtedness that I owe towards him for his invaluable guidance, extraordinary enthusiasm, thoroughness, sensitive criticism, and reviewing. Under his guidance and supervision I have learned a lot that will enable me to succeed in future. I am thankful to Dr. Bhavana K. Shah and Shri K. K. Shah for their valuable advice.

I am thankful to the management of A.D. Patel Institute of Technology (ADIT). I owe my heartfelt thank to Dr. R.K. Jain, Principal, A.D. Patel Institute of Technology, for providing all the necessary facilities for carrying out this work till its completion. I am thankful to Dr. Rajiv Bhatt, Head, Civil engineering department, ADIT for his constant support.

I am also thankful to Dr. V. S. Patel, the Director, Sophisticated Centre for Applied Research and Testing (SICART) for providing me a platform to pursue my doctoral studies and necessary support at all stages of this work.

I thank Dr. C.L. Patel and the management of Charutar Vidya Mandal for allowing me to pursue Ph.D. work and to make use of the facilities of Structural Engineering Department,
BVM. I thank Dr. F. S. Umrigar, Principal, Dr. A. K. Verma, Dr. L. B. Zala and Prof. J. J. Bhavsar for their moral support and allowing me to avail the facility of the BVM College. Besides them, I thank the rest of faculty members, my colleagues of the civil engineering department at ADIT for their encouragement, insightful comments and hard questions. I also thank technicians and peons of Structural Engineering Department, BVM and ADIT to help in carrying out the work in the different laboratories of the department.

I thank my fellow Prof Jayesh Pitroda, for the stimulating discussions, for the sleepless nights we were working together before deadlines and for all the fun we have had in the last four years.

I am thankful to Hardik, Ravi and Pintu for helping me to carry out the experimental work. I should not forget to express my gratitude and thanks to Mr. Hiteshbhai C. Patel and the whole Sardar Patel University staff, Mrs. Bindu U. Kansara who rendered useful support to me in the need of time.

I also express my thanks to the authors of the papers and books which were consulted for this work. I express my special indebtedness to all the reviewers who have spent their valuable time in reviewing my research papers and provided valuable inputs.

My deepest gratitude goes to my parents, Shri Jagdishchandra and Late Sudhaben and my aunts Savitriben and Kalavati for their constant encouragement and blessings. I really appreciate all your support, encouragement, love and understanding during my many years of study. I could continue this work only because of their support in upbringing my children Treta, Treya and Stavan during my study. Needless to mention that the inspiration and encouragement rendered to me by my sibling Mukesh Dave and Sister-in-law Dr. Vandna, Ishani and Diti, Shri Arvindbhai, Mrs. Purnimaben and Kalpanaben.

Last but not the least, I would like to thank my family, especially my husband Mukesh Vyas and daughters Treta and Treya for their constant encouragement from Canada and managing to stay away from me and my son Stavan who had remain source of my energy here.

The success of the entire work is attributed to the Grace of the Almighty and I firmly believe that I am only His instrument as a human being. I have done what He has helped me to do for bringing this wonderful day in my life.

Chetna M. Vyas
