ACKNOWLEDGEMENTS

Coming as I do from a joint family of farmers and unfamiliar with the process and discipline of "English" and "Technical Education," I know what it is to be 'educated'. My mother Smt. Ahalya, D. Sastry the only one educated in the large clan, spared no pains in bringing up her children and get the benefits of schooling and the discipline of learning. How right and appropriate is our tradition in insisting "MATRU DEVO BHAVA." My first acknowledgement is to my mother, to whom I bow once again.

Had it not been for my friend, who encouraged me in a most fruitful manner to knock the door of research and enter into it's unbound field, I would not have been writing these words. Such men are seldom found in one's life. I was fortunate in meeting such person in Prof. C. Sahasranam, MSc, M.Phil, Ph.D. I remain thankful to him.

Some people help us by self denial. Prof, Dr. Krishna Reddy, Head, Department of Mathematics, Sri Krishnadevaraya University, instead of pinning me down into his own discipline and area of interest, magnanimously directed me to go to my present supervisor and guide. I now realize the value of his sacrifice and the fund of generosity he manifested. I remain thankful to him.
I am now qualified and entitled to thank Dr. K. Ramakrishna Reddy, M.A, M.Phil, PhD, Professor of Management, Head of the Department of Post Graduate Studies in Management and, Member, Executive Council, Sri Krishnadevaraya University and my guide and supervisor who received me, a total stranger with unaffected warmth and introduced me to this exciting field of IT and its several dimensions. What transpires between a research guide and an old student is not amenable for recording. His encouragement, support and constant pressure is seen in the completion of this work. I remain indebted to him and to his lady Prof. Suvarna, Professor of Mathematics, SK University.

At the fag end of my career, I was drawn into research, which was indeed a reversal of the usual process. The Management of Sri Siddhartha Education Society (SSES), were kind enough to appreciate my change of direction and came forward to help me and remove normal obstacles in the process. I remain thankful to Dr.G.Parameshwara, Joint Secretary, SSES and Sri.C.N.Narasimha Murthy, Administrative Officer, SSES, for their far sight and encouragement.

I am personally thankful to Dr.M.R.Hulinayakar, Managing Trustee, Sridevi Education Charitable Trust, Tumkur, for his gesture in inviting me on to his educational enterprise and liberally allowing
me to pursue my research regardless of its consequences on to the college administration. I also thank Prof. S.R. Devaprakash, M.E., M.S (U.S.A), Principal, Sridevi Institute of Engineering and Technology, Tumkur for the direct and indirect support he is extending to me in my research activity.

My wife Smt Veda K. Shastry and our children Smt. Chaitra Prasad and Megha Sastry, have extended unusual degrees of tolerance and understanding in the pursuit of a learning process, which I should have taken up at some 30 years ago. I would be failing myself, if I don't acknowledge my debt of gratitude to my wife and children.

(K. KASINATH SAstry)
