Acknowledgement

This thesis is a result of four years of work and it is now my honor and pleasure to express my gratitude to all the people who made it possible.

First and foremost I would like to express my deepest gratitude to my guide Dr. Banwari Lal for introducing me to the field of hydrocarbon biotechnology. I am grateful to him for showing immense patience and not throwing me out in the middle of the course. I am thankful to him for his encouragement and for giving me the freedom to do my experiments my own way. His diligence has been a constant inspiration and the lessons that I’ve learnt from him will remain my treasured possessions through life.

I would like to thank Dr. R K Pachauri, Chancellor and Dr. Vibha Dhawan, Vice Chancellor, TERI University for providing the infrastructure and environment to enable this work. I'm also grateful to Dr. T P Singh. Ex-director, TERI and Dr. Subash Chander for their invaluable advice and encouragement.

I am grateful to my SRC members Dr. V Dhawan, Dr. Sanjay Saxena and Dr. Suneel Pandey for keeping a keen eye on my progress. I am grateful for their suggestions and active participation in my work. If it weren’t for them, I would have probably taken another two years to complete this work.

A very warm and special thanks to Gp. Capt (Rtd) Rajiv Seth, Registrar, TERI University for being just the person that he is. His optimistic attitude, cheerful personality and lovely humor brightened our, sometimes, very gloomy days. In him, students see a friend and I sincerely hope he always stays that way.

I am extremely grateful to Dr. van Beilen, Dr. Kazunari Sei, Dr. Nobuo Kato and Dr. Kenneth Hammel for guiding and helping me at crucial times in my work.

I would also like to thank Dr. Alok Adholeya and Dr. Nutan Kaushik for their help, encouragement and support.

My sincere thanks to the TERI University faculty Mr. Yateen Joshi, Mr. Arvind Seth, Dr. Nutan Kaushik and Dr. Prasad Reddy for preparing me for my doctoral work.

I am also grateful to my seniors Dr. Sanjeet Mishra, Dr. Dhruva Bhattacharya, Dr. P. M. Sarma, Dr. Pragati Tiwari, Dr. Reena Singh, Dr. Tanu and Dr. Kamlesh Shukla for their suggestions and help. Thanks especially to Dr. P. M. Sarma and Dr. Dhruva for their guidance and help in the molecular aspects of this work. Very special thanks to Dr. A. Gaur, Dr. Anupama, Vikas, Alpana, Shilpanjali, Manish and Prasun for their help and support. Loving thanks to Krishnan, Srivalli and Neha for their help and for pulling me out of tough situations.

I have been lucky to be blessed with exemplary juniors in Akhil, Guneet and Jyotsana. I would also like to thank all the trainees who did their dissertations in our labs for bringing freshness in our lives as also teaching us to work with limited space and infrastructure®. I am also grateful to Mr. Dileep Kumar and Mr. Gangi Reddy for their cheerful help and support.
I am extremely grateful to God and the TERI University recruitment cell for getting the Class of 2002 together. I can’t find the words to express my love and gratitude for my batch mates for simply being the lovely people that they are. Deepak, Hema, Nemika, Nirmal, Nishritha, Ritu, Rajalakshmi, Sangeeta and Sonu, thankyou so much for being such wonderful friends. Deepak and Nishritha, thankyou for your invaluable help in thesis writing.

I would like to specially thank Ms. Sonali Patle whose friendship is among my most treasured possessions. I’m grateful to her for her unconditional love and support and for being able to count on her friendship in the worst of times. I am also thankful to Suren for being such a wonderful friend.

I am thankful to Indian Oil Corporation Ltd. (IOCL), Oil and Natural Gas Corporation Ltd. (ONGC) and the Department of Biotechnology (DBT) for sponsoring my studies. There is very little we could have done without their support. I am also indebted to Dr. Agnihotri, Dr. Khurana, Dr. Chauhan, Dr. Ashok, Dr. Nimmi Singh, Dr. Mishra and Dr. Sarbhai of the EOR lab at IRS for explaining the nuances of the petroleum industry to a microbiologist as also for the field work. I am also grateful to Mr. Khazanchi, Dr. Kale and Dr. Lehmbbar Singh of ONGC for their encouragement and support. Thanks are also due to Dr. Tuli, Dr. M. P. Singh and Dr. H. Kaur of IOCL for their help and support. Thanks are also due to CSIR for providing fellowship during my doctoral work.

I am thankful to Dr. Shalini Tyagi and Rahul for gracefully hosting me during my frequent trips to Delhi in the past year. I’m also grateful to them for inquiring about my thesis writing every time I met them, which did not allow me to get lax about it.

My sincere thanks to Mr. Halpeth, Mr. Sarvanna, the administrative cell and all my friends at TERI Bangalore (especially Sailaja) for their help, encouragement and support. I am also thankful to my friends Ami and Smitha in Bangalore for their friendship, love and support.

I am very thankful to Neena Mata, Seema Jakhmola, Jyoti Gupta, Pratibha Shukla, Kamal Sharma and Radhika for being so gracious in their help. I’m glad to be able to count on Neena and Jyoti to help me out inspite of their boss keeping them on their toes all the time.

I am indebted to Mr. Rambaran, Mr. Abu, Mr. Vinod Kumar, Mr. Samarjeet, Mr. Naushad and the always cheerful Mr. Shiva for their excellent technical support. If Rambaran was not such a pro at washing glassware a lot of more experiments would have failed. I am thankful to Abuji and Vinod for teaching us the handling of crude oil and to Mr. Samarjeet and Shiva for their help.

My sincere thanks to Kamalji and Pratibha, for going out of their way to ensure that our fellowships are on time and for their ever timely and cheerful help.

I am also indebted to Mr. R. K. Joshi for taking time out of his busy schedule and helping out with our poster presentations. Thanks are also due to the IT help desk and officers who promptly attended to our complaints to ensure that our research never stopped because of a computer fault. A special thanks to our dispatch department and library for their support.

I am extremely thankful to the officers of the Electrical Deptt. Mr. Dinesh, Mr. Ashok, Mr. Nautiyal for their 24x7 support. If it wasn’t for their day and night monitoring of our incubators and shakers, this work would have been impossible.
I feel a deep sense of gratitude to my family for having taught me the good things that really mattered in life. They have ensured that I never felt alone and have motivated me to do the things I did not think were possible for me to do. I am indebted to them for believing in me. I am also thankful to my in-laws for their love, patience and support.

No amounts of words are enough to express my gratitude for the immense love and support that I’ve got from my husband, Aman. He has been a source of strength and inspiration for me. Whatever little multitasking and prioritizing I’ve learnt, I’ve learnt from him. I’m also grateful to him for the timely payment of my fees long after my fellowship was exhausted 😊. I am thankful to God for giving me his best gift ever, in Aman.

If I have left out some people, my forgetfulness may please not be mistaken for ingratitude. I am thankful to all the people who have enriched my life and helped me directly or indirectly in these past years.
