Acknowledgement

This thesis which is the outcome of five years work has been a tremendous journey for me. During this time I have gained immensely not only from what science has taught me but also through learning about life, friendship and love from people whose paths have crossed mine at one point or another in this journey. Therefore I would like to express my gratitude to all those who have lent a helping hand, encouraged me and brought bits (and at times considerable!!) wisdom into my life all of which has helped me with my work and to grow as a person.

Foremost I thank Dr. Banwari Lal for introducing me to the field of environmental microbiology, the pursuit of which has opened my eyes to such amazing facets of science and nature that it inspired me to get up every single day with a passion for learning something new. His dedication to work, diligence, patience and his ability to establish large application oriented ventures using lab scale technologies are qualities that are truly inspirational.

I would also like to thank Dr. Pachauri, Chancellor and Dr. Bhojvaid, Vice Chancellor TERI University, Dr. Vibha Dhawan, Executive Director TERI for providing the infrastructure and environment that helped enable this work. A special thank you to Dr. Seth, Registrar TERI University for his unending patience and support especially during days that were challenging and arduous.

I express my gratitude to Dr. Holliger and Dr. Theo Smits for sharing their expertise and providing me with guidance at crucial junctures of the tenure of my work. Thanks to all the other members of the lab at the EPFL, Lausanne especially Heidi and Stephanie for making my stay there so memorable.

I am grateful to my SRC members Dr. Dhawan, Dr. Agnihotri, Dr. Pandey for the direction they provided during my doctoral tenure. I would like to whole heartedly thank Dr. Adholeya, Dr. Saxena and Dr. Kaushik for their guidance and support. I also thank Professor Rupal and Dr. Rakesh Jain for their support. Sincere thanks to Dr. Prasad Reddy, Gangi Reddy, Dileep, Dr. Ramesha as well as Dr. Reena Singh for their help.

A very whole hearted and warm thank you goes out to Dr. Ligia Noronha, for her understanding and encouragement as well as the space she has allowed me to complete my doctoral thesis. Thanks are also due to my colleagues at the ST area for the consideration they have shown me during this strenuous time. Very big thanks to Binny...
who has helped me tremendously with all the formatting and to Kiran, Saju and Valsa as well for their assistance.

Thanks to Dr. Sanjeet Mishra, Dr. Dhruv Bhattacharya and Dr. Priyangshu Sarma, seniors who lent a helping hand (and a caustic comment!!) whenever it was needed. Thanks as well as Dr. Ruchika Singh, Dr. Himali, Dr. Meeta and Mr Abu Swaleh for their support.

Krish, you are the best lab-mate one could have -keeping me on my toes with the lively battles for the laminar and all things concerning the lab 😄. Sri, you together with Krish have been there and helped me out whenever I was in need especially during the writing of this thesis....thanks for all your selfless help and advice. Prasun, my tenure at the lab has been made memorable by your friendship... thanks for being there. To all my other colleagues during the doctoral tenure Jyotsna, Deepak Pant, Nitu, Sonali, Akhil as well as Deepak Prem, Vaishali, Pooja, Niti, Kadambari, Vanit, and Guneet, thanks for all your help and for some great times.

Neena and Jyoti, thanks a lot for always finding the time to help me out despite your hectic schedules. The same goes out to Saroj, Radhika, Prathibha, Kamal Sharma and Seema for all their assistance. I am also grateful to the University Grants Commission for providing me with fellowship during the tenure of my doctoral work. I also acknowledge the support provided by the Swiss Agency for Development and Cooperation for the project under which this work was conducted.

The experimental work during the tenure would not have been possible but for the technical assistance of Mr Rambaran, Mr Samarjeet, Mr Vinod Kumar and Mr Shiva as well as Mr Hetram and Mr Joshi. A warm thank you to Rambaranji for his skill with having the glassware sparkling clean and ready as well as enlivening the lab with his humorous stories and wisdom. I am also grateful to the people in charge at the Electrical Department, Mr Dinesh, Mr Ashok, Mr Nautiyal, Mr Mahesh and Mr Dogra for their continuous vigil of all our equipment and for seeing that they run smoothly.

As I turn to thank my family I realize how truly indebted I am to them for all the love they have given me and the sacrifices they have made to help me reach here. Dad, from travelling 60 km every day just to see us smile, waiting for hours at end while I completed my lab work during my Masters tenure and making our joy yours....thank you. Knowing that you’re always by our side whatever may come is the best gift we have been blessed with. Ma, you have taught me to work hard and with passion for a larger cause...you have also taught me to follow my heart, be brave, live life to the fullest and smile through life’s toughest moments. You are truly an inspiration. Dabs, from being the thorn at my side to the best brother in town, your sense of humour and
understanding never fails to lift my spirits. There’s still time to form “S²D” and rock the world....

To Ma and Dewta, the coolest in-laws on the planet....thank you for embracing me and helping me discover a whole new and exciting world. Ma, your love, strength and pursuit of knowledge never cease to amaze me. Thanks for all the yummy cuisine, mekhlas and so much more. For my Granny who recently passed away.... your zest for life and fortitude inspires me each day. To Aita, my grandmother-in-law one of the most loving and selfless person I know- Apunar karone, ejoni bhal buadi hoboloi mor hodai chesta thakibo. To Lux aunty, Ipsita, Anarupa, Arathi and Rimly and all my extended family and friends, you all have been there through all my ups and downs giving me strength and making me a better person. Words will never be enough to thank you all.

To the man who is the love of my life and so much more, Priyangshu you are truly my rock. You have brought me hope and faith when all the chips were down. Your endless love and support through thick and thin is what has made this possible. Thanks for all the tireless corrections of the endless drafts and your patience during the long waits as I wrote this thesis. Also thank you for all the little things.....especially for trying all the weirdest cuisine at my insistence and bearing with “hard rock” despite being the “gazhal man” 😊 You have enriched my life. Words will never be able to encompass all that you mean to me..... so I’ll just end by saying I am blessed to be with you. Tumi sab moor karane.......
