ACKNOWLEDGEMENTS

It is highly fortunate for me to have come under the able guidance of Dr. P. Ramakrishna Rao, Professor & Head, Department of Biochemistry, Sri Krishnadevaraya University, Anantapur. His constant guidance, critical advice, valuable discussions, friendly nature and encouragement during the entire course of study have greatly helped to give the thesis its present form. I express my profound sense of gratitude to him.

I am extremely thankful to my teachers Dr. S. Dayananda, Dr. D. Sarala Kumari, Dr. N. Ch. Varadacharyulu, Dr. K. Lakshmi Devi and Dr. C. Suresh Kumar for their help and encouragement.

I place on record the valuable help given by my co-research scholars Jhansi Rani, Rajeswari, Sailaja, Sita, Padmaja, Anuradha, Rajyalaxmi and Kumar and to the non-teaching staff Krishna Reddy, Sankar and Krishnaiah for their kind cooperation.

I sincerely thank the members of staff and research scholars of Department of Botany and Microbiology, Sri Krishnadevaraya University for their cooperation and valuable suggestions to carryout this work.

I owe my gratitude to my friends Raghu, Ramamurthy, Radha, Sai, Sainath and Vijay for their encouragement and support during the course of the study.

I cherish the support, cooperation and encouragement given by my parents, brother and sisters without whose whole hearted cooperation venture would not have been fruitful.
My thanks are due to Mr. V. Sahadevan for typing the thesis at short notice of time.

At the end, I thank the University Grants Commission, New Delhi for awarding me Junior Research Fellowship and Senior Research Fellowship and the authorities of Sri Krishnadevaraya University, Anantapur for providing the facilities to carryout this work.

V. RAMAKRISHNA
