I put on record to express my deepest gratitude and profound indebtedness towards my mentors, Dr Leena Srivastava, Executive Director and Dean, Faculty of Policy and Planning, TERI University and Prof Subhash Chander, Advisor, TERI University for their gracious guidance, support and encouragement right from the conceptualisation of the research plan till the finalisation of the manuscript. I heartily accept that without their untiring efforts, it would not have been possible for me to complete this piece of work.

I am thankful to Dr R K Pachauri, Chancellor and Dr Vibha Dhawan, Vice-chancellor, TERI University for providing me with infrastructure and other necessary facilities to carry out this study.

The review has been developed over the past five years-and-a-half and has benefited from the insights of many colleagues and friends who have provided feedback and helped generously with information. Acknowledgments are due to many – it is very difficult to name all of them. I greatly acknowledge the support and useful comments that I received from several academics and experts during my literature review and paper collection. Thanks are due to Prof Tim Foxon (Imperial College, London), Dr Roberto Martinez-Espineira (Department of Economics, St Francis Xavier University, Canada), Dr Marie-Helene Zerah, CERNA, France, Dr David N Barton (Interconsult International, Oslo), Chris Kitchen (Sustainable Development Unit, DEFRA, London), Dr V Grace Mitchell (CSIRO Urban Water, Australia), Dr Stewart Burn (CSIRO Urban Water, Australia), Dr Giorgos Kallis (Metron Research Coordinator, University of the Aegean) and Prof Michael Nieswiadomy (Department of Economics, University of North Texas, USA). Apart from them, I am very appreciative for the thoughtful and constructive comments made by several anonymous reviewers during the review of literature and synthesis of research ideas.

I am extremely thankful to my Research Committee members for their valuable suggestions, willing help and kind guidance during the course of periodic assessment. Their feedback greatly helped to improve the overall structure and basic reasoning of analysis. Thanks are due to Dr S K Sarkar, Dr Malini Balakrishnan and Dr Ranjan Bose during early developments and pre-PhD course work. Many thanks to Dr Puneet Chitkara for teaching me methodological and procedural ‘problems and pitfalls’ of economic valuation and modelling. Timely help and cooperation from all other faculty members of the TERI University during the course of investigation is gratefully acknowledged. My sincere thanks are also due to Grp Capt (Rtd) Rajiv Seth, Registrar, TERI University and administrative officers Mr. Kamal Sharma and Ms.
Pratibha Shukla, for their help and cooperation. Timely help provided by the Accounts Section and CIT help-desk is duly acknowledged.

My warmest thanks are also due to Prof Sueli Correa de Faria of Catholic University of Brasilia and Prof Konstantinos Tsagarakis, Department of Economics, University of Crete for giving me opportunity to present my doctoral work during the Brasilia Congress on Environmental Planning and Management at Brasilia and at Rethymnon, Greece respectively. I would like to pay special thanks to Dr Rajaram Vasudevan and Dr Subijoy Dutta, US-EPA – they are a great source of inspiration to me and I always look forward to for their guidance and support in future.

I am especially thankful to the library staff of NIUA, TERI, CAPART, and IEG for helping me with book loans and journals. I am also thankful to my friends for survey support and assistance in data collection during the hot summer month and monsoon. Special thanks to the survey team for carrying out the survey and cooperating during briefing sessions and field tests. I will be failing in my duty if I do not be glad about Ms Veena for her support and ever-helping attitude during the course of research.

I consider myself fortunate to be part of the TERI’s research team working in the area of Policy and Planning and I gratefully acknowledge the financial support provided by the Water and Sanitation Program – South Asia of the World Bank that enabled me to undertake my fieldwork. University Grants Commission (UGC) under the JRF/SRF in Environmental Sciences stream provided the Research Fellowships during the work.

My vocabulary falls short to express my thanks to Dr Deepak Prem and Dr Pooja Joshi who stood by me during the stresses and strives of my Ph.D work. My thanks are due to all my friends Dr Dhruva Bhattacharya, Dr Vaishali Sabharwal, Dr Vinit Kathuria, Dr Priyangshu Sarma, Srinivas, Anand Prakash Tiwari and other fellow researchers for their moral support. Thanks are due to the members of Ph.D community at the TERI University especially Ritu Paliwal, Nemika Relhan, Deepak Pant, Nirmal Saha, Snigda Susheel, Deepshikha, Nidhi Gupta and others for their pleasant company during these years. They have helped me generously with not only the feedback on the initial concept, information and insights regarding research experiences from other sector, or feedback on specific sections but also provided me with stress-free environment by making research ‘not-so-difficult-and-boring’.

I am thankful to my colleagues at the Department of Environmental Sciences, Babasaheb Bhimrao Ambedkar University, Lucknow for generously helping me in every step towards finishing this work on time despite my important teaching schedule. Thanks are due to Prof M
Yunus, Prof D P Singh, Prof R P Singh, Dr S K Dwivedi, Dr Shikha and Narendra for making the atmosphere at the department very pleasurable and lively. Last but not the least, no words of mine can adequately express my indebtedness to my parents. I am extremely thankful to Swami Atmaswarupanadaji and Swami Amritarupanadaji of the Divine Life Society, Rishikesh for their blessings, lessons, affection and constant encouragement throughout my difficult days.

Needless to say, responsibility for any errors of omission and interpretation remains with myself despite all the efforts of all the aforementioned to set me on the right track.

Above all, I thank God for all His blessings.

Venkatesh Dutta
