ACKNOWLEDGEMENTS

The author is indebted to Dr. P.L. Narasimha Rao, for his kind guidance, constant supervision and most inspiring discussions during the progress of these investigations. Her sincere thanks are due to Prof. P.S. Sarma, for his keen interest in these studies.

The author is grateful to Prof. E.F. Abraham, Sir William Dunn School of Pathology, University of Oxford, for a gift sample of DL-α-aminocaprylic acid; Dr. A. Ballio, Instituto Superiore Di Sanita, Rome, for a sample of 2,2-dimethyl-5-oxo-hexahydroimidazo(5-1,b)thiosolo-3,7-dicarboxylic acid; Dr. G.W. Rolinson, Beecham Research Laboratories, Surrey, England, for a gift of 6-aminopenicillanic acid; Drs. V.S.K. Char and S.R. Modak of the National Chemical Laboratories, Poona for cultures of P. notatum 832 and P. chrysogenum Q176.

The assistance in obtaining the infra-red spectra and microanalyses provided by Prof. D.K. Banerjee, Dr. B.B. Iyer and Dr. M.V. Bhat of the Organic Chemistry Department is duly acknowledged. It is a pleasure to record the author's appreciation of the co-operation of all her colleagues in the department.

The author is thankful to the authorities of the Indian Institute of Science, Bangalore, for the facilities accorded and the award of a scholarship during 1962-1963 and the University Grants Commission for the award of a research fellowship from 1963.
