## CONTENTS

### Chapter 1

**INTRODUCTION** ........................................................... 01 - 05

### Chapter 2

**REVIEW OF LITERATURE** ............................................. 06 - 28

2.1 Some Basic Concepts in Reliability .......................... 06
2.2 Proportional Hazards Model (PH model) .................. 13
2.3 Proportional Reversed Hazards Model (PRH model) .. 13
2.4 Weighted Distributions ............................................. 14
2.5 Shannon’s entropy .................................................... 16
2.6 Kullback- Leibler divergence measure ..................... 20
2.7 Affinity between distributions .................................. 22
2.8 The concept of inaccuracy ............................................ 24

### Chapter 3

**MEASURE OF INACCURACY** ........................................ 29 - 52

3.1 Introduction ............................................................. 29
3.2 Characterization of probability distributions using the functional form of inaccuracy measure ............ 30
3.3 Characterization of probability distributions under the proportional hazards model assumption ..... 36
3.4 Inaccuracy measure for weighted distributions ........... 49

### Chapter 4

**THE GENERALIZED INACCURACY MEASURE** ...................... 53 - 70

4.1 Introduction ............................................................. 53
4.2 Definition and Properties ........................................... 53
4.3 Characterization Results ............................................. 59
4.4 An alternative measure of inaccuracy ......................... 65
Chapter 5

CHERNOFF DISTANCE AND AFFINITY FOR TRUNCATED DISTRIBUTIONS

5.1 Introduction 71
5.2 Definition and properties 72
5.3 Characterization theorems 80
5.4 Chernoff distance original and weighted distributions 83
5.5 Affinity for truncated distributions 88
5.6 Relationship with other discrimination measures 94

Chapter 6

RESIDUAL INACCURACY MEASURE AND RELATED CONCEPTS IN DISCRETE TIME DOMAIN

6.1 Introduction 97
6.2 Residual inaccuracy in discrete time 97
6.3 Inaccuracy of length biased distributions 105
6.4 Affinity between two residual life distributions in the discrete case 106

REFERENCES 109 - 118
