LIST OF TABLES

Table 1.1: List of TB Drugs and its mechanism of action of their specific targets
Table 3.1 Homology Modeling Programs
Table 3.2: Loop Modeling Programs
Table 3.3 Side Chain Modeling Programs
Table 3.4 Model assessment programs
Table 6.1: Steric chemical Properties of MTB-DNA Gyrase using Procheck
Table 6.2: Docking energies of all currently available inhibitors for Mtb-DNA Gyrase
Table 6.3: Physico-chemical properties of GTF analogs
Table 6.4: Docking energies of GTF analogs with Mtb-DNA Gyrase
Table 7.1: The active domains of Mtb-AIr model with their sequence and E-value and description.
(http://pfam.sanger.ac.uk/search/sequence).
Table 7.2: Docking Interaction of D-Cycloserine with Mtb-Ddla
Table 7.3: Physico-Chemical Properties of D-Cycloserine Analogs
