# CONTENTS

**Acronyms Used**

1. Introduction

1.1 General 1
1.2 Flora and Vegetation 2
1.3 Concept of the Sacred 3
1.4 Cultural Values and Heritage of Sacred Groves 3
1.4.1 Worship/Deities of Sacred Groves 3
1.5 Why Conservation? 11
1.6 Ecological Significance 12
1.7 Economic significance 12
1.8 Threats 13
1.8.1 Commercial Forestry 13
1.8.2 Development Projects 13
1.8.3 Shift in belief systems 13
1.8.4 Sanskritization 14
1.8.5 Pilgrimage and Tourism 14
1.8.6 Removal of Biomass 14
1.8.7 Encroachment 14
1.8.8 Modernization and Market Forces 14
1.8.9 Fragmentation 14
1.8.10 Sociocultural Causes 14
2. **Review of Literature**

2.1 Global Scenario

2.2 Indian Scenario

2.2.1 Sociological Dimensions

2.2.1.1 Antiquity

2.2.1.2 Ownership and Management

2.2.1.3 Ethnicity

2.2.1.4 Gender Issues

2.2.2 Biological and Ecological Values

2.2.2.1 Biological values

2.2.2.1.1 Plant diversity

2.2.2.1.2 Animal diversity

2.2.2.2 Ecological values

2.2.2.2.1 Recharge of aquifers

2.2.2.2.2 Soil conservation and nutrient cycling

2.3 Kerala Scenario

2.3.1 Distribution

2.3.2 Categorisation of sacred groves of Kerala

2.3.3 Vegetation structure and dynamics

2.4 Significance of the Present Study

3. **Materials and Methods**

3.1 Sampling

3.1.1 Study Area and Sampling Sites

3.1.2 Sampling Seasons

3.1.3 Sample Collection and Preservation

3.1.3.1 Plant Samples

3.1.3.1.1 Preparation of Herbarium

3.1.3.1.2 Identification of Plant Specimens
3.1.3.2 Soil Samples 57
3.2 Analytical Methods 58
3.2.1 Physical Parameters 58
3.2.1.1 Moisture Content 58
3.2.1.2 Hydraulic conductivity 59
3.2.1.3 Infiltration 60
3.2.2 Chemical Parameters 61
3.2.2.1 pH 61
3.2.2.2 Electrical Conductivity 61
3.2.2.3 Organic Carbon 61
3.2.2.4 Nitrogen 62
3.2.2.5 Exchangeable Sodium and Potassium 63
3.2.2.6 Exchangeable Calcium Magnesium 64

4. Results and Discussion
4.1 Floral Diversity 70
4.1.1 Systematics of the Flora 105

4.2 Soil Physicochemical Properties 184
4.2.1 Hydraulic Conductivity 185
4.2.2 Soil infiltration 186
4.2.3 Soil Moisture 187
4.2.4 pH 204
4.2.5 Electrical Conductivity (EC) 220
4.2.6 Organic Carbon 236
4.2.7 Available Nitrogen 252
4.2.8 Exchangeable Sodium 268
4.2.9 Exchangeable Potassium 284
4.2.10  Exchangeable Calcium  300
4.2.11  Exchangeable Magnesium  316

5.  Summary and Conclusions
5.1  Salient Results  336
5.1.1  Floral Diversity  336
5.1.2  Soil Physicochemical Properties  338
5.2  Major Threats  342
5.3  Suggested Conservation Strategies  342

6.  References
344

7.  Plates  350-365
