ACKNOWLEDGEMENTS

Few years back an astrologer told me that I shall never be able to complete my research, today I am just a step away from proving his prediction and my superstitions wrong. As an ordinary student I would never have been able to complete this work had I not got the support of various persons. Amnesia is an asset while writing acknowledgements otherwise the list of these gentlemen and women would be voluminous than the actual work.

After being lost in transition in the first half of this decade, I decided to go to basics and rediscover myself. It was then Professor Jamal A Khan, who showed faith in me and took me under his supervision. I put on record my deep gratitude for his guidance, comments and shaping this research and thesis.

I am thankful to Dr. Affifullah Khan, Chairman Department of Wildlife Science for his valuable comments, clearing doubts whenever I was in and for sharing his knowledge about the flora of Rajaji National Park.

I am equally thankful to Professor H.S.A. Yehya, Dr. Satish Kumar and Dr. Orus Ilyas, Dr. Faiza Abassi and Dr. Iqbal Imam faculty at Department of Wildlife Sciences for their timely help and guidance.

I sincerely thank NRDMS Division, Department of Science and Technology Government of India for funding this research project under ecological modeling for Himalayas for Uttarakhal (now Uttarakhand) Transect. I thank R. Siva Kumar, Head, NRDMS, Department of Science & technology and Dr. Nisha Mendiratta, Addl. Director & Scientist ‘E’, NRDMS Division for their interest in this research. I am thankful to Shri S.C. Chandola (Chief Wildlife Warden, Uttarakhand) for giving permission to work in the Chirak (East and West) and Haranol beats of Rajaji National Park. I also thank Shri G.S. Pandey (Director, Rajaji National Park) for allowing me to work in the Park and guiding staff for their cooperation. I sincerely thank Shri Sanathan (DFO, Narendranagar forest division, Munn ki Reti) for permitting me to work in Phakot Watershed Area. I also thank Shri Samir Sinha (chairman, research review committee) for kindly considering our work proposal.

I thank Dr. S.P.S. Kushwaha (Head, Forestry & Ecology Division, Indian Institute of Remote Sensing Dehradun) for providing maps of Pathi Rao and allowing me to use IIRS lab during GIS modeling. Thanks are also to Dr. T.S. Kachhwaha (Head, FRED, RSAC, Lucknow) for providing maps of Phakot Watershed Area.

I thank Dr. K.N. Ganeshaiah (UAS, Bangalore) for his valuable suggestions during the review meeting and for inviting in the workshop on spatial modeling. I also thank Dr. S. Sreekesh (Asso. Prof. JNU) and Prof. Charu C. Pant (Deptt. Of Geology, KU. Nanital) for making my stay comfortable during review meetings in their respective departments.

I also thank Director Wil for allowing us to use the library for literature survey and Dr. S. A. Hussain for arranging accommodation.

My special thanks to local forest staff especially Shri Dhongwal and Shri Semwal (Forest Guard Phakot) and Shri Rawat (Forest Guard Rajaji National Park) for being cooperative and providing support during fieldwork. I thank my field assistants Vigay Singh Negi and Shiv Singh Negi, Massodi Lal, Chottu (Phakot) and Mohd. Isaah (Pathri Rao) for working sincerely without any complaints. I also thank their families for their love and care.
I specially thank Shri Sughantho Choudhary for his advice and sharing knowledge on reptiles, Inam Sabir, his wife Ishrat and his parents for treating me as their family member. Thanks are also to the entire Katkore village especially Rajendra and G.S. Rawat and Aunty for not letting me feel away from home.

My special thanks to Suchimitra Mukhopadhyay (SRF, IIRS) for kindly providing her services during GIS modeling. Thanks also to Uttara Panday (JRF, IIRS) for making the visit pleasant. I also thank Varsha Nathnani and Prerna (SRF, HNB Univ. Garhwal) for their support and cooperation during field work. I also thank Nasir Nazeer (JRF, WII) for initially assisting me in data collection in the field. I specially thank Junaid Nazir (RA, EADA, Abu Dhabi) for introducing me and giving me opportunity to join this project.

I also thank non teaching staff of DWS specially Rafat Yasmeen, Anjum, Mustafa Kamal, Chotte Khan Gaffar, Arshid, Azim, Tanveer, Babu Bhai and Nadeem, Vir Singh for their support.

I owe this research to two friends Bilal and Kaleem. They were instrumental at every stage of this thesis be it data analysis, literature search or giving shape to the final draft. Without Bilal Habitat Suitability chapter would have remained incomplete and Kaleem was my muse in the department. Thank You.

My lot of love and special thanks to Shamshad, Mehraj for joining me in the field for some time. Athar for editing the draft, Andaleeb, Tanushree, Tabassum, Bushra, Puja, Azram, Shalini, Masood, Shah Bilal, Bilal, Tauqeer and others for making the boring part of data analysis enjoying and with their smiling faces lifting my spirits.

I am also thankful to my friends in Aligarh Muslim University especially Ashiq Hussain, Manzoor, Farooq, Tariq, Sajad and friends in my current department Zuhaib, Imran, Zahoor. Special thanks to Malik Suhail.

I am lucky enough to be born in a family who despite certain limitations value education high. I got financial help, when I did not deserve it and emotional support when I needed it most. I am here because of my family otherwise the battle would have been lost long back.

I thank my father and mother for their love, affection and care. I thank you for bringing me into this world and bringing me up.

If I had to dedicate this thesis, it would have been my elder brother Parweiz Ahmad. I wish everyone has a brother like him. I also thank my brother Sajad, my sisters, Bhabis and all the kids especially Masarat and Maviya.

And obviously, Thank God.

Tanweer A. Dar
