LIST OF FIGURES

Fig. 4.3-A. Effect of different inoculum levels of *Meloidogyne incognita* Race-3 on plant growth parameters and root-knot disease development in *Pseuderanthemum atropurpureum*.

Fig. 4.3-B. Showing temporary day time wilting in *Pseuderanthemum atropurpureum* at higher inoculum levels of *Meloidogyne incognita* Race-3.

Fig. 4.3-C. The arrows showing development of lager size galls on the roots of *Pseuderanthemum atropurpureum*.

Fig. 4.3-D. The arrows showing the egg masses produced by females of *Meloidogyne incognita* Race-3 on galled roots of *Pseuderanthemum atropurpureum*.

Fig. 4.3-E Arrows showing the formation of galls at the base of stem near soil level by the infection of *Meloidogyne incognita* Race-3 in *Pseuderanthemum atropurpureum*.

Fig. 4.4-A Effect of different inoculum levels of *Rhizoctonia solani* on plant growth and root-rot disease development in *Pseuderanthemum atropurpureum*.

Fig. 4.5-A Effect of individual, concomitant and sequential inoculation of *Meloidogyne incognita* Race-3 and *Rhizoctonia solani* on plant growth and disease development in *Pseuderanthemum atropurpureum*.

Fig. 4.5-B. Arrows showing yellowing (1), browning (2) and drying (3) of leaves of *Pseuderanthemum atropurpureum* infected with *Meloidogyne incognita* Race-3 and *Rhizoctonia solani*.

Fig. 4.5-C Arrows showing rotting in the branches of *Pseuderanthemum atropurpureum* infected with *Meloidogyne incognita* Race-3 and *Rhizoctonia solani* (The rotting started from lower branches and proceeded upwards)

Fig. 4.5-D. Arrows showing rotting and deterioration of galls due to infection of *Rhizoctonia solani* in *Pseuderanthemum atropurpureum*.

Fig. 4.5-E. Arrows showing the shape of root cankers i.e. spherical (1) and hemispherical (2) and root-girdling (3) in *Pseuderanthemum atropurpureum* infected with *Meloidogyne incognita* Race-3 and *Rhizoctonia solani*.

Fig. 4.5-F. Arrow showing the formation of sclerotia on rotted stem of *Pseuderanthemum atropurpureum* infected with *Meloidogyne incognita* Race-3 and *Rhizoctonia solani*.

Fig.4.5-G. Arrows showing the formation of sclerotia on rotted roots (1), root-cankers (2) and galls (3) of *Pseuderanthemum atropurpureum* infected with *Meloidogyne incognita* Race-3 and *Rhizoctonia solani*.

Fig. 4.6-A. Interactive effect of different inoculum levels of *Meloidogyne incognita* Race-3 and *Rhizoctonia solani* on plant growth and disease development in *Pseuderanthemum atropurpureum*.

Fig. 4.6-B. Arrow showing stem girdling of *Pseuderanthemum atropurpureum* infected with *Meloidogyne incognita* Race-3 and *Rhizoctonia solani*.

Fig. 4.6-C. Arrows showing stem cracking of *Pseuderanthemum atropurpureum* infected with *Meloidogyne incognita* Race-3 and *Rhizoctonia solani*.
