Dr. Raul Prebisch was Secretary General of UNCTAD from 1964 to 1969. In his writing he articulated a development paradigm where the issue of development strategy was placed within the context of center-periphery view of the world in which there were rich, technologically advanced dynamic and fast growing industrial countries at the center and poor technologically backbard slow paced developing economy at the periphery. He believed that the central question of global development and positive sum interdependence was how to integrate, the peripheral countries in to the growth dynamics of the center.
