ACKNOWLEDGEMENTS

At the outset I express my deepest sense of gratitude to my research supervisor, Dr. Kausik Gupta, Head of the Department, Department of Economics, The University of Burdwan, for his continuous supervision, guidance, comments and suggestions offered to me during the course of my investigation. I am indebted to Dr. Gupta for sparing his invaluable time out of his busy schedule whenever I needed it the most.

I would also like to extend my gratefulness to Prof. Sugata Marjit, Prof. Manash Ranjan Gupta, Prof. Ajitava Ray Chaudhuri, Dr. Rajat Acharyya, Prof. Soumyendra Kishore Datta and Dr. Rajarshi Majumder for giving me ample time for discussions on various aspects of my work. I express my heartfelt gratitude to them for their valuable comments and suggestions.

I have immensely benefitted from comments received from the lectures I had delivered in different seminars at the Jawaharlal Nehru University, New Delhi, Jadavpur University, Kolkata, and The University of Burdwan, Burdwan. So, I would like to acknowledge with thanks the opportunity given to me by the organisers of these seminars. I am also grateful to Ms. Chameli Pandit, Research Scholar of the Department of Economics, University of Burdwan, for extending her help in the computational part of the empirical aspect of the study.

Added to this I am indebted to all those who have assisted me in various ways to complete this study.

The financial assistance obtained from the UGC under the scheme of “Minor Research Project” is duly acknowledged.
Lastly, I would like to remember the constant encouragement and unstinted inspiration of my wife, Subarna. Without her love and cooperation it would not have been possible for me to complete this study. It is my bounden duty to express my heartfelt feelings to my wife and son, Aritra, for the isolation suffered by them during the entire course of my study.

The responsibility of any error that may remain in the study is entirely mine.

Arabinda Ghosh
