# CONTENTS

## INTRODUCTION

## CHAPTER I. PREREQUISITE

1.1 Notation and Terminology  
1.2 Preliminary results and concepts  
1.3 Distributions and their convolution  
1.4 Integration  
1.5 Construction of Boehmians  
1.6 Laplace transform of distributions  
1.7 Kernel Theorem  
1.8 Chain Formula

## CHAPTER II. FOURIER-PLANCHEREL TRANSFORM FOR VECTOR-VALUED FUNCTIONS AND BOEHMIANS

2.1 Introduction  
2.2 Fourier-Plancherel Transform on $L^2(A)$  
2.3 Boehmian Space $B(L^2(A), \Delta)$  
2.4 Boehmian Space $B(L^2(A), \hat{\Delta})$  
2.5 Fourier-Plancherel Transform for Boehmians  
2.6 Comparative Study

## CHAPTER III. LAPLACE TRANSFORM FOR VECTOR-VALUED BOEHMIANS

3.1 Introduction  
3.2 Laplace Transform of Distributions  
3.3 Boehmian Space $B(G, \Delta)$  
3.4 Boehmian Space $B(E(A), L(\Delta))$  
3.5 Laplace Transform of Boehmians  
3.6 Inversion Theorem  
3.7 Comparative Study
CHAPTER IV. A CHARACTERIZATION FOR
LAPLACE-TRANSFORMABLE
DISTRIBUTIONS ON $\mathbb{R}^2$

4.1 Introduction 95
4.2 Preliminaries 97
4.3 Main Theorem 100

CHAPTER V. CHANGE OF VARIABLE IN THE
CONTEXT OF BOEHMIANS

5.1 Introduction 111
5.2 Preliminaries 113
5.3 Boehmian Space 119
5.4 Change of Variable 126
5.5 Illustration 129
