<tbody>
<tr>
<td>2.1</td>
<td>The mean feeding rate (% body wt/day) of freshwater fish, <em>Cyprinus carpio</em> fed with feeds incorporated with different concentrations of three leaf extracts of <em>Aegle marmelos, Andrographis paniculata</em> and <em>Euphorbia hirta</em> for a period of 50 days. Each value is an average of five individual observations with a standard deviation.</td>
<td>66</td>
</tr>
<tr>
<td>2.2</td>
<td>The mean assimilation rate (mg/g/day) of freshwater fish, <em>Cyprinus carpio</em> fed with feeds incorporated with different concentrations of three leaf extracts of <em>Aegle marmelos, Andrographis paniculata</em> and <em>Euphorbia hirta</em> for a period of 50 days. Each value is an average of five individual observations with a standard deviation.</td>
<td>68</td>
</tr>
<tr>
<td>2.3</td>
<td>The mean metabolic rate (mg/glday) of freshwater fish, <em>Cyprinus carpio</em> fed with feeds incorporated with different concentrations of three leaf extracts of <em>Aegle marmelos, Andrographis paniculata</em> and <em>Euphorbia hirta</em> for a period of 50 days. Each value is an average of five individual observations with a standard deviation.</td>
<td>71</td>
</tr>
<tr>
<td>2.4</td>
<td>The mean feed conversion ratio of freshwater fish, <em>Cyprinus carpio</em> fed with feeds incorporated with different concentrations of three leaf extracts of <em>Aegle marmelos, Andrographis paniculata</em> and <em>Euphorbia hirta</em> for a period of 50 days. Each value is an average of five individual observations with a standard deviation.</td>
<td>72</td>
</tr>
<tr>
<td>2.5</td>
<td>The mean feed conversion efficiency of freshwater fish, <em>Cyprinus carpio</em> fed with feeds incorporated with different concentrations of three leaf extracts of <em>Aegle marmelos, Andrographis paniculata</em> and <em>Euphorbia hirta</em> for a period of 50 days. Each value is an average of five individual observations with a standard deviation.</td>
<td>75</td>
</tr>
<tr>
<td>2.6</td>
<td>The mean protein efficiency ratio of freshwater fish, <em>Cyprinus carpio</em> fed with feeds incorporated with different concentrations of three leaf extracts of <em>Aegle marmelos, Andrographis paniculata</em> and <em>Euphorbia hirta</em> for a period of 50 days. Each value is an average of five individual observations with a standard deviation.</td>
<td>77</td>
</tr>
<tr>
<td>2.7</td>
<td>The mean specific growth rate (%/day) of freshwater fish, <em>Cyprinus carpio</em> fed with feeds incorporated with different concentrations of three leaf extracts of <em>Aegle marmelos, Andrographis paniculata</em> and <em>Euphorbia hirta</em> for a period of 50 days. Each value is an average of five individual observations with a standard deviation.</td>
<td>80</td>

</table>
bacterial pathogen, *Aeromonas hydrophila*. Each value is a mean of six individual observations with a standard deviation.

3.50 Effect of different concentrations of leaf extract of *Andrographis paniculata* on serum alkaline phosphatase (µg PNP/mg protein) in *Cyprinus carpio* infected with the bacterial pathogen, *Aeromonas hydrophila*. Each value is a mean of six individual observations with a standard deviation.

3.51 Effect of different concentrations of leaf extract of *Euphorbia hirta* on serum alkaline phosphatase (µg PNP/mg protein) in *Cyprinus carpio* infected with the bacterial pathogen, *Aeromonas hydrophila*. Each value is a mean of six individual observations with a standard deviation.

3.52 Effect of different concentrations of leaf extract of *Aegle marmelos* on serum alkaline phosphatase (IU/L) in *Cyprinus carpio* infected with the bacterial pathogen, *Pseudomonas fluorescens*. Each value is a mean of six individual observations with standard deviation.

3.53 Effect of different concentrations of leaf extract of *Andrographis paniculata* on serum alkaline phosphatase (IU/L) in *Cyprinus carpio* infected with the bacterial pathogen, *Pseudomonas fluorescens*. Each value is a mean of six individual observations with a standard deviation.

3.54 Effect of different concentrations of leaf extract of *Euphorbia hirta* on serum alkaline phosphatase (IU/L) in *Cyprinus carpio* infected with the bacterial pathogen, *Pseudomonas fluorescens*. Each value is a mean of six individual observations with a standard deviation.

3.55 Effect of different concentrations of leaf extract of *Aegle marmelos* on serum peroxidase activity (IU/ml) in *Cyprinus carpio* infected with the bacterial pathogen, *Aeromonas hydrophila*. Each value is a mean of six individual observations with standard deviation.

3.56 Effect of different concentrations of leaf extract of *Andrographis paniculata* on serum peroxidase activity (IU/ml) in *Cyprinus carpio* infected with the bacterial pathogen, *Aeromonas hydrophila*. Each value is a mean of six individual observations with a standard deviation.

3.57 Effect of different concentrations of leaf extract of *Euphorbia hirta* on serum peroxidase activity (IU/ml) in *Cyprinus carpio* infected with the bacterial pathogen, *Aeromonas hydrophila*. Each value is a mean of six individual observations with a standard deviation.

3.58 Effect of different concentrations of leaf extract of *Aegle marmelos* on serum peroxidase activity (IU/ml) in *Cyprinus carpio* infected with the bacterial pathogen, *Pseudomonas fluorescens*. Each value is a mean of six individual observations with a standard deviation.

3.59 Effect of different concentrations of leaf extract of *Andrographis paniculata* on serum peroxidase activity (IU/ml) in *Cyprinus carpio* infected with the bacterial pathogen, *Pseudomonas fluorescens*. Each value is a mean of six individual observations with a standard deviation.

3.60 Effect of different concentrations of leaf extract of *Euphorbia hirta* on serum peroxidase activity (IU/ml) in *Cyprinus carpio* infected with the bacterial pathogen, *Pseudomonas fluorescens*. Each value is a mean of six individual observations with a standard deviation.

3.61 Effect of different concentrations of leaf extract of *Aegle marmelos* on serum protein (g/dl) in *Cyprinus carpio* infected with the bacterial pathogen, *Aeromonas hydrophila*. Each value is a mean of six individual observations with a standard deviation.
