CONTENTS

Introduction 1 – 7
Review of Literature 8 - 27

CHAPTER

1) Population dynamics 28 – 41
  1.1 Introduction
  1.2 Materials and Methods
  1.3 Results
    1.3.1 Soil characteristics
    1.3.2 Water characteristics
    1.3.3 Abiotic factors
    1.3.4 Temperature
    1.3.5 pH
    1.3.6 Dissolved oxygen
    1.3.7 Rainfall
    1.3.8 Biotic factors
  1.4 Discussion

2) Impact of rearing space on the predatory efficiency of *D.indicus* 41 – 46
  2.1 Introduction
  2.2 Materials and Methods
  2.3 Results
  2.4 Discussion

3) Influence of temperature on the predation of V instar of *D.indicus* 47 – 51
  3.1 Introduction
  3.2 Materials and Methods
  3.3 Results
  3.4 Discussion

4) Influence of food deprivation on the predatory efficiency of the instars of *D.indicus* 52 – 56
  4.1 Introduction
  4.2 Materials and Methods
  4.3 Results
4.4 Discussion

5. Influence of vegetation on the predatory performance of the instars of *D. indicus*
   5.1 Introduction
   5.2 Materials and Methods
   5.3 Results
   5.4 Discussion

6) Influence of competition on the predation of the instars of *D. indicus* 66 – 70
   6.1 Introduction
   6.2 Materials and Methods
   6.3 Results
   6.4 Discussion

7) Influence of prey density on the predation of the instars of *D. indicus* 71 – 75
   7.1 Introduction
   7.2 Materials and Methods
   7.3 Results
   7.4 Discussion

8) Reproductive potential and fecundity of *D. indicus* 76 – 81
   8.1 Introduction
   8.2 Materials and Methods
     8.2.1 Hatchability rate
     8.2.2 Temperature on hatchability rate
   8.3 Results
     8.3.1 Oviposition pattern
     8.3.2 Incubation and hatchability
     8.3.3 Stadial period and nymphal mortality
     8.3.4 Nymphal mortality
     8.3.5 Survival rate
   8.4 Discussion

9) Mass rearing recommendation of *D. indicus* 82 – 84

Summary 85 – 87
Bibliography 88 – 101
