Acknowledgement

Research is formalized curiosity. It is poking & prying with a purpose. Much of research outcomes are systematic attempts to exploit what is known & make it better. Above all, research is about creating a new knowledge and this creation would have not been possible without the support of each & everyone involved in my life. I take this opportunity to thank everyone for their endless support in crafting this whole new creation. I thank God for giving the required strength & morale to carry on this journey with a very positive wave.

I heartily thank all my supporters and well wishers, especially the select few that I am about to mention, without whom I may not have gotten to where I am today, at least not sanely.

Who better than Dr Jayashree Pohnerkar to start with, my research supervisor, my guiding light & my one stop shop for all the mentorship. She is one of the best scientists I have ever met. She always inspired me to aim high and work hard to achieve my dreams. I am extremely indebted to her for giving me this opportunity to explore the field of molecular biology in the best possible way. Her unending flow of ideas, constant encouragement and her zeal to get things done on time made for a great working relationship and gave me the impetus to finish. It is only because of her that I learnt so much about molecular biology and cleared so many milestones so easily. I must not forget to mention one amazing quality of hers and that is her patience. Thank you madam…for everything (especially the delicious pooran polis)!

I am grateful to Prof. Ramesh Goyal, former Vice Chancellor and Prof. Yogesh Singh, Vice Chancellor, The Maharaja Sayajirao University of Baroda, for giving me an opportunity to work in this University and providing all necessary facilities for the completion of my thesis work. It’s my pleasure to acknowledge Prof. Nikhil Desai, Former Dean, Faculty of Science, for his kind personality and he has always helped me whenever I needed that extra support in the administration work.
I am extremely thankful to **Prof. Sarita Gupta**, Head, Department of Biochemistry, for her constant support and her co-operation in making so many facilities available at the right time so that my research could go on smoothly. I am deeply grateful to Prof. C. Ratnaprabha for her valuable suggestions. I would also like to acknowledge Prof. G. Nareshkumar for his concern and critical comments during annual presentations which always made me strive for perfection. I would like to thank Prof. Rasheedunnisa Begum, for her continuous encouragement to sincerely do good and competitive work, Prof. Pushpa Robin, Dr. Laxmipriya and Dr. Devesh Suthar for their kind concern. My sincere thanks to Dr. Rajesh Singh, Dr. Ravi Vijayvagaria, Dr. Jyoti Vasu, Dr. Gopalji Gopal. I would like to thank the Biochemistry department as a whole for endless words of appreciation and motivation which played an important role in carving my overall personality as a researcher. I am thankful to them for warmly accepting me and ensuring that I bring the best out of me.

I am deeply grateful to Dr. Mrinalini Nair, Microbiology Dept. for extending a helping hand whenever possible and whenever needed. Thank you Ma’am for allowing me to use the resources of your lab for some important experiments, for sparing your valuable time for my presentations and also for giving your amazing suggestions!

I take this opportunity to also thank my teachers at Department of Biosciences, Sardar Patel University - Prof. Kiran Kalia, Dr. Vasudev Thakkar, Dr. R.B. Subramanian and Prof. Datta Madamwar who were few of the first people to introduce me to the awesomeness of Molecular Biology and Biochemistry. Thank you teachers, for arousing in me, interest for research and innovation.

I am highly indebted to Michael Cashel, Laboratory of Molecular Genetics, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health, Bethesda, Maryland, USA. for his generous support.

My vote of thanks would never be complete if I do not thank all of my lab seniors. Namita didi - for constantly providing amazing resources and guidance for my
research, Keyur Sir – for helping me with the foundation work and constant positive
boost, Maulik Sir – for the endless informative support. Thank you Mukta didi & Purva
didi for your warmth and making me feel at home, when I was new in the lab. Heartfelt
thanks to each one of you for making each moment unforgettable. I extend the same to
Sups for being a constant source of laughter and fun during my stressed out times and
always ready for a cup of tea, Divs, for her endless help and friendly support and
understanding nature. Her hung ho attitude always gave me inspiration to achieve the
best. Thank you for the ‘chitchats’ in lab. Thanks Nirali for your sincere efforts in
completing some of my experiments.

I am really thankful to all my seniors in the department who always made sure that my
smile never left my lips and were always ready to help and guide whenever and
wherever possible. For this I would like to thank Heena didi, Jyotika di, Hiren bhai,
Iqbal sir, Hemendra sir, Aditi didi, Chirayusir, Nirajsir, Prakashsir, Jishadi, Vikas sir
and Pradeep Mishra.

I have to thank my colleagues, I should rather say department mates – Radha (always
and forever a very good friend and a listener), Rushikesh (very helpful), Swapnali,
Purna (motivator), Nidheesh, Anubha, Akhilesh, Muskaan, Mrinal, Hemanta, Vijay,
Chanchal, Naresh, Mitesh, Prashantkumar, Jeetendra, Kavita for my all routine
activities like Chat on Tea, Seminars and other scientific but healthy discussions. I am
also thankful to Manikandan and Anuja for their help.

My dearest and lovable thanks to all my juniors Ankita, Nirja, Arpi, Ashish, Sumeet,
Tina, Shoaib, Ujwal, Abhay, Ragitha, Komal, Mitul, Gaurav and Komal Chawda who
have helpme in every possible way. Special thanks to Gaurav and Komal their
generous help in wrapping up my thesis.

I must thank all my work buddies (masters students), Ruchira (the first one to work
with me, I have never seen such a bright girl), Shilpa (really really hardworking), Sanket
(for his insightful and innovative work), Utpal (Babboo), Pranav (the most sincere
and polite child of our lab till date – for being eveready to help), Prajish (people call him Google but he calls himself Sherkhan – for some great work), Aparna – for being helpful in her own silent way, Bishnu, Bhavik, Prit, Palak and Batul who worked along with me and directly contributed to this work.

I am highly grateful to the members of office especially Pethe Sir and Akshita Ma’am, Ramesh Bhai Nare, Ramesh Kamle, Shailesh Bhai, Manish Bhai, Vyas Bhai, Rameshbhai Parmar, Vijay Bhai and Narayan Bhai. I am thankful to Milindbhai at the University office for helping in administrative matters and Mukeshbhai for maintaining for looking after our accounts. I would also like to thank Ratilal bhai for maintaining cleanliness in the lab.

I would like to extend my gratitude to UGC for the Research Fellowship: UGC-RFSMS-JRF/SRF without which my research would have been just a dream.

Now it is the turn of some near and dear ones to be thanked.

I deeply thank my darling friends Shweta (constant source of inspiration and always there for me), Chitavani, Radha (Nepali girl with a constant supply of smiles and delicious food who never left my side) and Supriya (super chatterbox) for being my fun suppliers and support donaters. They stood by me not only in my best times but also in my worst, constantly setting me on my feet so I could move ahead with confidence. I am also thankful to Kalpesh and Hrishit for their friendly co-operation. I am thankful to Simran Gomes, my beautician for lots of emotional and beautiful support.

I have no words to express the gratitude I am feeling for my family. They have been amazingly patient and encouraging right from day one. Their faith and support have been invaluable for me. My research and thesis is a tribute to them. I am extremely lucky to have parents who always taught me to work hard and stand by my principles. My dedication and sincerity are gifts of their upbringing. I heartily appreciate my Mom who is a strong pillar of support and has always led me to the right path. She has been a role model and if there is one person in the whole world I want to be like, it my Mom!
Dad I would like to thank you for your unwavering faith in my decisions which instilled confidence in me. My special love and thanks to my baby sister Richa without whom I cannot imagine my life. Thank you Richa for bringing joy to my life. You always taught me endless things. Thank you for all the amazing gifts and surprises, for the lovable hugs and fights, for the sharings and carings. It is truly said that there is no other best friend than a sister!

Finally, and most importantly, I would like to thank the greatest blessing of my life, my husband Tushar. He has been a constant source of rejuvenation and inventiveness. He, with his undying optimism and hope, never let me back out or stop for a single moment. He has always kept me on my toes and made me a go getter! He was extremely patient during my mood swings and always brought cheerfulness to my life. Without him I was only living... my heart started beating the day I met him. Thanks dear for being with me in my journey from science student to scientist. With him this journey was smooth and easy. Also, I thank Tushar’s parents for their faith in me and for understanding my passion towards research. I am lucky to have such kind hearted parents who always considered me as their own daughter and gave me the same freedom and opportunity that they have given to their son.

I would like to thank all of my close friends and family, who patiently listened to my concerns, complaints, frustrations and cheered me right till the end!

Finally, I thank one and all who have helped me perceptibly or otherwise, in achieving my goal.

Krishma Tailor
