CHAPTER – 3

Methodology

In this chapter for analysis of information selection of subject, standards of measurement, formation of questionnaire, method, method of interview and unification of information and description of statistical process is included.

Design of the study

In a case study historical background of an individual or an institution is inevitable. Information is obtained. Then its current condition is examined through the information. Such information is analyzed and interpreted. Thus in this case study past condition and present condition of Shri Safiq Shaikh is thoroughly studied.

Selection of subject

For the purpose of study related persons, close friends neighbors, family members, people related with sports, are selected for obtaining information. The researcher has selected nearby 15 such persons to collect information about Safiq Shaikh.

Criterion Measures

The following are the standards of Measurement.

1) Questionnaire 2) Interview.
Construction of questionnaire and its method of functioning.

The researcher has made all possible efforts for the reliability of his research work. He has evaluated Shri Safiq Shaikh as an individual, as a player and as an encoring person who is always full of enthusiasm for sports activities. For all these there questionnaires the researcher has taken the reference of research work conducted by Sanjay Thakor, March -2010- This reference he has taken for physical education, Mahadev Desai Vidyalaya, Gujarat Vidyapeeth, Sadara, Sanjay Thakor’s research “Fifa Referee, a case study of Shri GulabSinh Chauhan” has been much helpful to the researcher of this case study.

Three aspects of a person’s case study are covered in this research questionnaire.

1) Person as an individual
2) Person as an organizer
3) Person as encouraging sports activities.

The researcher through questionnaire has made efforts to know the opinion of others about Shri GulabSinh Chauhan.

10) Pathik Patel
11) Gaurang Zala
12) Khuram Shaikh
13) Ashok Zariwala
14) Niraj Silavat
15) Arvindbhai Rami
Interview method

Interview is the best example to collect information through questionnaire.

Researcher can obtain direct face to face answer through questionnaire. This is another form of original questionnaire. Interview method is the best means to gather correct response.

Through interview:
1) Secret information can be obtained
2) The answers are true and reliable and on the spot.
3) The respondent gets an opportunity to disclose the information he has.

The researcher has collected information of his subject person regarding three aspects 1) as a person 2) as a player 3) as an encourager of sports.

Interview method is important as it is reliable.

Interview planning

The objective of this research was to obtain vast information through the informer. The researcher organized interviews at different places. Besides the researcher had given prior information regarding the consumption of time. He had organized interview at certain place.

The researcher had asked certain questions from questionnaire so that it can be checked whether the answer given in the questionnaire and given in interview are the same or not. The respondents could not know the objective of the researcher asking
questions. They were restricted to the researcher. Here the researcher selected some persons to give their opinions for Shri Safiq Shaikh. The names are as under.
