ACKNOWLEDGEMENT

The author is grateful to Dr. S. Rajasekar, Lecturer, Department of Physics, Manonmaniam Sundaranar University, Tirunelveli for his scientific guidance and stimulating discussions to enable him to proceed in the correct direction and do the research work successfully. He has motivated me at every crucial stage of the research work. He wishes to record his profound sense of gratitude and appreciation to Professor G. Shanmugam for his constant encouragement throughout the research work. He wishes to thank Thiru K. Alwan, Head of the department of Physics, A.K.G.S. Arts College, Srivaikundam for his moral support and constant encouragement throughout the research work.

He expresses his sincere thanks to Dr. P. Philominathan, Dr. A. Venkatesan, Dr. P. Muruganandam for their help at various stages of the research work.

He is deeply indebted to the Secretary, and the Principal of A.K.G.S Arts College, Srivaikundam for having given their consent to undertake the research work for Ph.D degree.

Last but not in the least I will be failing in my duty if I fail to mention the sincere help and cooperation of my spouse Mrs. Devi. The domestic difficulties that she had endured are beyond my words. This
thesis would not be what it is but for the unstinted service rendered by her, to achieve my life time goal.
