CONTENTS

CHAPTER – I: Introduction and Objectives
Section-1: 1
Introduction to simultaneous spectrophotometric and derivative spectrophotometric methods.

Section-2: 37
A brief review of isonicotinoyl hydrazones and their analytical applications.

Section-3: 47
Importance of the present investigations.

Section-4: 50
Objectives.

CHAPTER – II: Solutions and Instruments

Section-1: 62
Preparation of 2,4-dihydroxyacetophenone isonicotinoylhydrazone [RPINH]

Section-2: 64
Preparation of 2,4-dihydroxyacetophenone isonicotinoylhydrazone solution and salt solutions employed in the present investigation.

Section-3: 70
Instruments employed in the present investigations.
CHAPTER – III: General Experimental Procedures
Zero order spectrophotometry 73
Derivative spectrophotometric procedures. 78

CHAPTER – IV: Spectrophotometric Determination of Some Important Metal Ions

Section-1: 85
Spectrophotometric determination of titanium (IV)

Section-2: 96
Spectrophotometric determination of palladium (II)

Section-3: 105
Spectrophotometric determination of zirconium (IV)

Section-4: 114
Spectrophotometric determination of vanadium (IV)

Section-5: 124
Spectrophotometric determination of ruthenium (III)

CHAPTER – V: Derivative Spectrophotometric Determination of Some Important Metal Ions.

Section-1: 135
First and second derivative spectrophotometric determination of titanium (IV)

Section-2: 142
First and second derivative spectrophotometric determination of zirconium (IV)

Section-3: 147
First and second derivative spectrophotometric determination of palladium (II)
Section-4: 152
First and second derivative spectrophotometric determination of vanadium (V)

Section-5: 159
First and second derivative spectrophotometric determination of molybdenum (VI)

Section-6: 169
First and second derivative spectrophotometric determination of ruthenium (III)

CHAPTER – VI: 176
Simultaneous First Derivative Spectrophotometric Determination of Some Important Metal Ions.

Section-1: 181
Simultaneous first derivative spectrophotometric determination of titanium (IV) and copper (II).

Section-2: 186
Simultaneous first derivative spectrophotometric determination of zirconium(IV) and molybdenum(VI).

Section-3: 190
Simultaneous first derivative spectrophotometric determination of titanium (IV) and molybdenum (VI)

Section-4: 194
Simultaneous first derivative spectrophotometric determination of molybdenum(VI) and copper(II)

Section-5: 198
Simultaneous first derivative spectrophotometric determination of molybdenum(VI) and ruthenium(III)
**CHAPTER - VII:** Simultaneous Second Derivative Spectrophotometric Determination of Some Important Metal Ions

Section-1: 207
Simultaneous second derivative spectrophotometric determination of molybdenum(VI) and zirconium(IV)

Section-2: 213
Simultaneous second derivative spectrophotometric determination of titanium(IV) and copper(II)

Section-3: 218
Simultaneous second derivative spectrophotometric determination of titanium (IV) and molybdenum (VI)

Section-4: 223
Simultaneous second derivative spectrophotometric determination of molybdenum (VI) and copper (II)

Section-5: 228
Simultaneous second derivative spectrophotometric determination of molybdenum (VI) and ruthenium (III)

**CHAPTER – VIII:** Summary of the present investigations 234
