LIST OF FIGURES

1. Fig 1 Morphologic features of H. Pylori and NSAID-associated gastritis.
2. Fig 2 Duodenal and Peptic Ulcers
3. Fig 3 Bleeding perforation of Peptic ulcers
4. Fig 4 Pathogenesis of Peptic Ulcer
5. Fig 5 Mechanism of Gastric Secretion
6. Fig 6 Factors which influences the Ulcer activity
7. Fig 7 Mechanism of Peptic Ulceration, Mechanisms of gastric injury and Protection
8. Fig 8 Anti Ulcer Drugs and their side effects
9. Fig 9 Site of Drug Action
10. Fig 10 Mechanism of Antiulcer drugs
11. Fig 11 Human Receptor H2RA Mechanism of Action
12. Fig 12 Action of Flavonoids against Ulcer
13. Fig 13 The Plant Acanthus ilicifolius
14. Fig 14 Taxonomical Classification of the Acanthus ilicifolius
15. Fig 15 the Plant Acanthus ilicifolius
16. Fig 16 Occurrence Distribution of Acanthus ilicifolius
17. Fig 17 Vernacular Names of Acanthus ilicifolius
18. Fig 18 Steps involved in structure based drug design through in silico approach.
19. Fig.19 Targets of currently marketed small-molecule drugs, subdivided by biochemical class (Hopkins and Groon, 2002).
20. Fig. 20 Growth of crystal structure proteins deposited in Protein data bank
21. Fig.21 Potential areas for in silico intervention in drug discovery
22. Fig 22 SOXHLET APPARATUS
23. Fig 23 LogP graph has been constructed between predicted logP and experimental logP for standardization of Molinspiration algorithms for calculated drug molecules.
24. Fig 24. 2-D and 3D structural model graph for volume analysis by molinspiration calculation
25. Fig 25 Alignment file in the PIR format
26. Fig 26 Effect of Methanol extract of Acanthus ilicifolius leaves on ethanol induced ulcers
27. Fig 27 Comparative study of Ulcer index in Ethanol induced rats
28. Fig 28 Comparative study of gastric volume in Ethanol induced rats
29. Fig 29 Comparative study of gastric volume in Ethanol induced rats
30. Fig 30 Comparative study of Free Acidity in Ethanol induced rats
31. Fig 31 Comparative study of Total acidity in Ethanol induced rats
32. Fig 32 Histo pathological study of Control group
33. Fig 33 Histo pathological study of Ranitidine Treated group
34. Fig 34 Histo pathological study of MEAI Treated group
35. Fig 35 Effect of MEAI on Catalase activity
36. Fig 36 Effect of MEAI on SOD activity
37. Fig 37 Effect of MEAI on Glutathione activity
38. Fig 38 Effect of MEAI on Glutathione peroxidase activity
39. Fig 39 Effect of MEAI on Glutathione reductase activity
40. Fig 40 Graphical representation of BLAST results for selection of template and structures 1HZX, 1JFP, 1F88, 2BGK, and 2IMS.

41. Fig 41 Multiple sequence alignment of Bovin rhodopsin crystal structures, 1HZX, 1JFP, 1F88 and hHH2R with Clustal W algorithms.

42. Fig 42 Homology model of hHH2R is showing seven transmembranes and each transmembrane shown in different color.

43. Fig 43 Ramachandran plot for hHH2R showing most of the residues falling in core region

44. Fig 44 Docking study of alpha amyrine with hH2R

45. Fig 45 Docking study of Cyano colchicines with hH2R

46. Fig 46 Docking study of Lyoniresinol with hH2R
