ACKNOWLEDGEMENT

Greenness around us was always a pleasure for me from the infant age and it grew along with my growth. Curiosity to know the plant life and the existence of other life based on plants brought me to work for this study. My deep and endless gratitude is to God who gave me all infrastructures to complete the work in a successful way.

This thesis is the result of the vision and effort of many people. Firstly, I am indebted to my supervisor, Dr. Joseph Jose, Mahatma Gandhi University Centre for Research, Department of Botany, Sacred Heart College, Thevara for suggesting the field of investigation, skilful guidance, keen interest and encouragement throughout my research work. I express my gratitude to the Principal, Sacred Heart College, Thevara for providing necessary facilities. I extend my thanks to the faculty members of the Department of Botany, Sacred Heart College, for their valuable help. I am also grateful to my senior colleagues Dr. John E. Thoppil, Sr. Lecturer, Department of Botany, University of Calicut, Dr. Roy Joseph, National University of Singapore and Mrs. (Dr.) Annie Joseph, Cochin College, for the constant encouragement throughout the work.

My special thanks to Shri Vijay Deo, Chief Executive, Deo Aromatic, Kalamassery, Cochin for his kind help during GC analysis. My thanks is extended to Shri Palanisami who helped me in operating the software AutoCad for finding and recording the measurements of chromosomes. Shri P.A. Devassy, Gardner of Sacred Heart College, Thevara also deserves thanks for germplasm conservation, without which the present work could not have been successful.

Last but not least, the kind co-operation, assistance and forbearance of my friends and well wishers are also thankfully acknowledged.
