

PREFACE

In the present thesis are presented the embryological features of four species belonging to the family Compositae by the author under the guidance of Dr. T. Pullaiah, M.Sc., Ph.D., F.B.S. The author wishes to use this occasion to unveil her genuine and deep sense of gratitude to Dr. T. Pullaiah, Lecturer in Bio-Sciences, Sri Krishnadevaraya University, Anantapur, not only for suggesting the problem and also for his keen interest and unceasing encouragement during the course of investigation without which it would not have been possible to accomplish the work.

Further she also wish to express her sincere thanks to the Head of the Department of Bio-Sciences and to the authorities for providing the necessary facilities for carrying out the research work.

She also wish to acknowledge Mr. K. Sridhar Rao, Research Scholar of Bio-Sciences Department for his help in need.

The author owes a great deal to her parents who are responsible for her present position.
