CHAPTER | Page
---|---
1 | INTRODUCTION | 1
2 | REVIEW OF LITERATURE | 4
2.1 | Microbial production of cellulase | 5
2.2 | Structural features of cellulose | 5
2.1.2 | Cellulolytic organisms | 7
2.1.2.1 | Fungi | 7
2.1.2.2 | Bacteria | 9
2.1.3 | Enzymology of cellulose degradation | 9
2.1.4 | Factors influencing cellulase production | 12
2.1.4.1 | Carbon source | 13
2.1.4.2 | Nitrogen source | 18
2.1.4.3 | pH | 20
2.1.4.4 | Temperature | 21
2.1.4.5 | Inoculum density | 21
2.1.4.6 | Lignocellulose | 22
2.1.4.7 | Surfactants | 25
## MATERIALS AND METHODS

### 3.1 Cultivation of the isolated *Pencillium sp.*

- Page 26

### 3.2 Optimization of cellulase production by *Pencillium sp.*

- Page 26
  - 3.2.1 Selection of medium for the maximal production of cellulase by *Pencillium sp.*
    - Page 27
  - 3.2.2 Effect of initial pH of the medium
    - Page 28
  - 3.2.3 Effect of incubation temperature
    - Page 28
  - 3.2.4 Effect of supplementation of Carbon source
    - Page 28
  - 3.2.5 Effect of Nitrogen source
    - Page 29
  - 3.2.6 Effect of Natural lignocelluloses
    - Page 29
  - 3.2.7 Effect of Surfactants
    - Page 30

### 3.3 Analytical procedures for determination of growth, extracellular protein content and activity of individual enzyme components of cellulase system

- Page 30

### RESULTS AND DISCUSSION
