	<u>Page</u>
INTRODUCTION	1
Location and extent	2
Communication	2
Topography	3
Drainage	3
Climate	4
Acknowledgements	4
Chapter I	
PREVIOUS WORK & REGIONAL GEOLOGY	6
Previous work	6
Regional Geology	17
Chapter II	
GEOLOGY OF THE AREA	20
Stratigraphic nomenclature	21
General characters	24
Lithology and field relations	25
Phyllites, schists & thick-bedded sandstones	25
Thickness frequency distribution of sandstone and phyllite	27
Banded argillite	28
Crystalline limestone & marble.....	29
Banded-haematite-quartzite, Banded-haema- tite-jasper-quartzite & Brecciated quart- zite.....	30

	<u>Page</u>
Nature of brecciation	32
Basic intrusives	33
Basic lava flows	34
Agglomeratic trap	35
Chapter III	
THE GEOLOGICAL STRUCTURE OF THE AREA	36
Terminology and method of study	36
Structural elements	38
Minor structural features	39
Bedding	39
Axial plane cleavage	40
Slip cleavage	42
Intersection of bedding and axial plane cleavage	43
Boudinage.....	43
Puckering.....	44
Striation lineations	45
Mineral lineations	45
Small-scale folds	46
Major structural features	47
Joints	47
Relation of the intrusive rocks to the structure of the region.....	50
Major folds	50
Thrust faulting	53
Faults.....	54
Unconformity	55
Structural geometry	55
Sector I	55
Sector II.....	60
Synoptic diagrams.....	62
Age relation of the planar and linear structures	64
Relation between folding and regional meta- morphism.....	65
Structural history	66

Chapter IV

	<u>Page</u>
PETROGRAPHY AND PETROGENESIS OF BASIC ROCKS.....	70
Petrography	71
Epidiorites	71
Altered dolerites	72
Quartz-dolerites	73
Mineralogy	74
Metabasites	81
Petrography	82
Mineralogy	83
Petrochemistry	88
Variation diagrams	90
Petrogenesis	92
Quartz-dolerite and Altered dolerites	92
Epidiorites and Metabasites.....	98
Age relations of the basic rocks	99

Chapter V

PETROGRAPHY OF METASEDIMENTARY ROCKS	101
Method of study	102
Terminology and classification	103
Quartz wacke sandstones	105
Phyllitic quartz wacke & schistose quartz wacke	109
Heavy mineral composition	113
Maturity of the sandstones	119
Provenance	120
Pelitic rocks	122

	<u>Page</u>
Banded argillite	123
Phyllites	124
Carbonate rocks.....	127
Recrystallised and partly recrysta- llised carbonate rocks.....	128
Thermally metamorphosed carbonate rocks	130
Banded-haematite-(jasper)-quartzite and Brecciated quartzite.....	134
Metamorphism	137

Chapter VI

SEDIMENTARY STRUCTURES	139
Vertical sequence of internal structures..	140
Graded bedding	141
Parallel lamination	142
Ripple-drift cross-laminations.....	143
Type 1 or Type A	144
Type 3 or Type C	145
Convolute lamination	148
Ripple marks	150
Sole markings	152
Paleocurrents.....	153
Introduction	153
Field measurements & Results	155

Chapter VII

ENVIRONMENT OF DEPOSITION	157
Parsoi phyllite	157

	<u>Page</u>
Carbonate rocks	167
Banded-haematite-quartzite	167
SUMMARY AND CONCLUSIONS	173
REFERENCES CITED	180
EXPLANATION OF PLATES	197

Tables

	<u>After page</u>
Table I ... Suggested stratigraphic sequence of the Parsoi area	25
Table II .. Modal compositions of quartz-dolerite, altered dolerites, epidiorite & meta- basites	71
Table III .. Twin laws in plagioclase feldspars of dolerites	75
Table IV ... Chemical analyses of basic intrusive rocks from the Parsoi area with some comparisions.....	88
Table V Normative composition of analysed basic intrusive rocks of the Parsoi area.....	88
Table VI ... Molecular values and molecular base values of analysed basic rocks according to Niggli.....	89
Table VII .. Modal composition of quartz wacke sand- stones of the Parsoi area	105
Table VIII . Heavy mineral frequencies in quartz wacke, phyllitic and schistose quartz wackes..	114
Table IX ... Percentages of euhedral, rounded and broken grains of tourmaline in quartz wacke, and phyllitic and schistose quartz wackes	(on page 115)
Table X ... Percentages of euhedral, elliptical and rounded grains of zircon in quartz wacke, and phyllitic and schistose quartz wackes.	116
