

LIST OF TABLES

CHAPTER - I

Table No.	Title	Located between the pages
1(a)	Proximate composition of purified proteins.	25 - 26
1(b)	Proximate composition of natural protein sources.	25 - 26
2	Composition of the purified diets PE <sub>0</sub> to PE <sub>4</sub> .	31 - 32
2(a)	Composition of vitamin mixture.	31 - 32
2(b)	Composition of mineral mixture.	31 - 32
3	Composition of the purified diets PE <sub>5</sub> to PE <sub>10</sub> .	31 - 32
4	Composition of the purified diets PE <sub>11</sub> to PE <sub>15</sub> .	31 - 32
5	Composition of the purified diets PE <sub>16</sub> to PE <sub>22</sub> .	31 - 32
6	Composition of the diets PE <sub>23</sub> to PE <sub>27</sub> with natural protein (Animal) sources.	31 - 32
6(a)	Vitamin and mineral mixture used in diets PE <sub>23</sub> to PE <sub>27</sub> .	31 - 32
7	Composition of the diets PE <sub>28</sub> to PE <sub>31</sub> with natural protein (plant) sources.	31 - 32
8	Composition of the experimental diets PE <sub>32</sub> to PE <sub>40</sub> .	31 - 32
9	Composition of the experimental diets PE <sub>41</sub> to PE <sub>47</sub> .	31 - 32
H <sub>1</sub>	Hydrographical data of the feeding experiments 1 to 7.	33 - 34
10	Growth, food conversion ratio and survival of juvenile <u>P. indicus</u> fed with purified diets PE <sub>0</sub> to PE <sub>4</sub> for 30 days.	41 - 42

(Contd.....)

10(A)	Determination of metabolic faecal nitrogen (MEN) in juvenile <u>P. indicus</u> using zero protein diet.	41 - 42
10(B)	Digestibility, PER, NPU, and BV obtained by the diets PE <sub>1</sub> to PE <sub>4</sub> in juvenile <u>P. indicus</u> .	42 - 43
10(C)	Analysis of variance of the data obtained by diets PE <sub>1</sub> to PE <sub>4</sub> .	42 - 43
11(A)	Digestibility, PER, NPU and BV obtained by the albumen diets PE <sub>5</sub> to PE <sub>10</sub> in juvenile <u>P. indicus</u> .	44 - 45
11(B)	Analysis of variance of the data obtained by albumen diets PE <sub>6</sub> to PE <sub>10</sub> .	44 - 45
12	Growth, food conversion ratio and survival of juvenile <u>P. indicus</u> fed with casein diets PE <sub>11</sub> to PE <sub>15</sub> for 30 days.	46 - 47
12(A)	Digestibility, PER, NPU and BV obtained by the casein diets PE <sub>11</sub> to PE <sub>15</sub> in juvenile <u>P. indicus</u> .	46 - 47
12(B)	Analysis of variance of the data obtained by casein diets PE <sub>11</sub> to PE <sub>15</sub> .	46 - 47
13	Growth, food conversion ratio and survival of <u>P. indicus</u> fed the purified diets PE <sub>16</sub> to PE <sub>22</sub> for 30 days.	48 - 49
13(A)	Analysis of variance of the data obtained by purified diets PE <sub>16</sub> to PE <sub>22</sub> .	48 - 49
14.	Growth, food conversion ratio and survival of juvenile <u>P. indicus</u> fed with diets PE <sub>23</sub> to PE <sub>27</sub> for 30 days.	51 - 52
14(A)	Digestibility, PER, NPU and BV obtained by the diets PE <sub>23</sub> to PE <sub>27</sub> in juvenile <u>P. indicus</u> .	51 - 52
14(B)	Analysis of variance of the data obtained by the diets PE <sub>23</sub> to PE <sub>27</sub> .	51 - 52
15	Growth, food conversion ratio and survival of juvenile <u>P. indicus</u> fed with diets PE <sub>28</sub> to PE <sub>31</sub> for 30 days.	53 - 54

(Contd.....)

15(A)	Digestibility, PER, NPU and BV obtained by the diets PE <sub>28</sub> to PE <sub>31</sub> in juvenile <u>P. indicus</u> .	53 - 54
15(B)	Analysis of variance of the data obtained by the diets PE <sub>28</sub> to PE <sub>31</sub> .	53 - 54
16	Growth, food conversion ratio and survival of juvenile <u>P. indicus</u> fed with diets PE <sub>32</sub> to PE <sub>40</sub> for 30 days	56 - 57
16(A)	Digestibility, PER, NPU and BV obtained by the diets PE <sub>32</sub> to PE <sub>40</sub> in juvenile <u>P. indicus</u> .	56 - 57
16(B)	Analysis of variance of the data obtained by the diets PE <sub>32</sub> to PE <sub>40</sub> .	56 - 57
17	Growth, food conversion ratio and survival of juvenile <u>P. indicus</u> fed with the diets PE <sub>41</sub> to PE <sub>47</sub> .	59 - 60
17(A)	Protein in diet, body, and faeces of juvenile <u>P. indicus</u> fed with diets PE <sub>41</sub> to PE <sub>47</sub> .	59 - 60
17(B)	Analysis of variance of the data obtained by the diets PE <sub>41</sub> to PE <sub>47</sub> .	59 - 60
18	Essential amino acid composition (Percentage of total protein) of some protein materials.	86 - 87

## CHAPTER - II

19	Composition of the experimental diets CE <sub>0</sub> to CE <sub>7</sub> .	103 - 104
20	Composition of the experimental diets CE <sub>8</sub> to CE <sub>14</sub> .	103 - 104
21	Composition of the experimental diets CE <sub>15</sub> to CE <sub>21</sub> .	104 - 105
22	Composition of the experimental diets CE <sub>22</sub> to CE <sub>28</sub> .	104 - 105
23	Composition of the experimental diets CE <sub>29</sub> to CE <sub>35</sub> .	105 - 106
24	Composition of the experimental diets CE <sub>36</sub> to CE <sub>43</sub> .	105 - 106.

(Contd.....)

H <sub>2</sub>	Hydrographical data of the feeding experiments 8 to 13.	105 - 106
25	Results of the feeding experiment with the diets CE <sub>0</sub> to CE <sub>7</sub> on juvenile <u>P. indicus</u> fed for 30 days.	108 - 109
26	Digestibility of carbohydrates in the diets CE <sub>0</sub> to CE <sub>7</sub> at 30% level by <u>P. indicus</u> .	108 - 109
26(A)	Analysis of variance of growth and food conversion ratio obtained by diets CE <sub>0</sub> to CE <sub>7</sub> in <u>P. indicus</u> .	108 - 109
27	Results of the feeding experiment with diets CE <sub>8</sub> to CE <sub>14</sub> on juvenile <u>P. indicus</u> fed for 30 days.	110 - 111
27(A)	Analysis of variance of growth and food conversion ratio obtained by diets CE <sub>8</sub> to CE <sub>14</sub> in <u>P. indicus</u> .	110 - 111
28.	Results of the feeding experiment with diets CE <sub>15</sub> to CE <sub>21</sub> on juvenile <u>P. indicus</u> fed for 30 days.	112 - 113
29	Digestibility of carbohydrate in the diets CE <sub>15</sub> to CE <sub>21</sub> by <u>P. indicus</u> .	112 - 113
29(A)	Analysis of variance of growth and food conversion ratio obtained by the diets CE <sub>15</sub> to CE <sub>21</sub> in <u>P. indicus</u> .	112 - 113
30	Results of the feeding experiment with diets CE <sub>22</sub> to CE <sub>28</sub> on juvenile <u>P. indicus</u> for 30 days.	114 - 115
31	Digestibility of carbohydrate in the diets CE <sub>22</sub> to CE <sub>28</sub> by <u>P. indicus</u> .	114 - 115
31(A)	Analysis of variance of growth and food conversion ratio obtained by the diets CE <sub>22</sub> to CE <sub>28</sub> .	114 - 115
32	Results of the feeding experiment with diets CE <sub>29</sub> to CE <sub>35</sub> on juvenile <u>P. indicus</u> fed for 30 days.	116 - 117
33	Digestibility of carbohydrate, in the diets CE <sub>29</sub> to CE <sub>35</sub> by <u>P. indicus</u> .	116 - 117
33(A)	Analysis of variance of growth and food conversion ratio obtained by the diets CE <sub>29</sub> to CE <sub>35</sub> in <u>P. indicus</u> .	116 - 117

(Contd.....)

34	Results of the feeding experiment with diets CE <sub>36</sub> to CE <sub>43</sub> on juvenile <u>P. indicus</u> fed for 30 days.	118 - 119
34(A)	Analysis of variance of growth and food conversion ratio obtained by the diets CE <sub>36</sub> to CE <sub>43</sub> in <u>P. indicus</u> .	118 - 119

CHAPTER - III

35	Composition of the base diet used in mineral requirement studies.	145 - 146
36	Composition of the experimental diets M <sub>1</sub> to M <sub>7</sub> to study calcium requirement.	145 - 146
37	Composition of the experimental diets M <sub>8</sub> to M <sub>14</sub> to study phosphorous requirement.	145 - 146
38	Composition of the experimental diets M <sub>15</sub> to M <sub>21</sub> to study copper requirement.	145 - 146
39	Composition of the experimental diets M <sub>22</sub> to M <sub>28</sub> to study zinc requirement.	145 - 146
40	Composition of the experimental diets M <sub>29</sub> to M <sub>35</sub> to study magnesium requirement.	145 - 146
41	Composition of the experimental diets M <sub>36</sub> to M <sub>42</sub> to study manganese requirement.	145 - 146
H <sub>3</sub>	Hydrographical data of the feeding experiments conducted with different groups of diets in the mineral requirement study.	145 - 146
42	Results of feeding experiment conducted with diets M <sub>1</sub> to M <sub>7</sub> on juvenile <u>P. indicus</u> for 45 days.	146 - 147
43	Body composition of <u>P. indicus</u> fed with diets M <sub>1</sub> to M <sub>7</sub> .	146 - 147
44	Analysis of variance of the data obtained with the diets M <sub>1</sub> to M <sub>7</sub> .	146 - 147
45	Results of feeding experiments conducted with diets M <sub>8</sub> to M <sub>14</sub> on juvenile <u>P. indicus</u> for 45 days.	148 - 149

(Contd.....)

46	Body composition of <u>P. indicus</u> fed with the diets M <sub>8</sub> to M <sub>14</sub> .	148 - 149.
47	Analysis of variance of the data obtained with diets M <sub>8</sub> to M <sub>14</sub> .	148 - 149
48	Results of feeding experiment conducted with diets M <sub>15</sub> to M <sub>21</sub> on juvenile <u>P. indicus</u> for 45 days.	150 - 151
49	Body composition of <u>P. indicus</u> fed with diets M <sub>15</sub> to M <sub>21</sub> .	150 - 151
50	Analysis of variance of the data obtained with the diets M <sub>15</sub> to M <sub>21</sub> .	150 - 151
51	Results of feeding experiment conducted with diets M <sub>22</sub> to M <sub>28</sub> on juvenile <u>P. indicus</u> for 45 days.	152 - 153
52	Body composition of <u>P. indicus</u> fed with the diets M <sub>22</sub> to M <sub>28</sub> .	152 - 153
53	Analysis of variance of the data obtained with the diets M <sub>22</sub> to M <sub>28</sub> .	152 - 153
54	Results of feeding experiment conducted with diets M <sub>29</sub> to M <sub>35</sub> on juvenile <u>P. indicus</u> for 45 days.	154 - 155
55	Body composition of <u>P. indicus</u> fed with the diets M <sub>29</sub> to M <sub>35</sub> .	154 - 155
56	Analysis of variance of the data obtained by the diets M <sub>29</sub> to M <sub>35</sub> in <u>P. indicus</u> .	154 - 155
57	Results of feeding experiment conducted with diets M <sub>36</sub> to M <sub>42</sub> on juvenile <u>P. indicus</u> for 45 days.	155 - 156
58	Body composition of <u>P. indicus</u> fed with the diets M <sub>36</sub> to M <sub>42</sub> .	155 - 156
59	Analysis of variance of the data obtained by the diets M <sub>36</sub> to M <sub>42</sub> .	155 - 156

(Contd.....)

CHAPTER - IV

60	Composition of purified diet - PDP.	175 - 176
61	Composition of practical feed- PFP.	176 - 177
H <sub>4</sub>	Hydrographical data of the feeding experiment with PDP, PFP and fresh clam meat.	176 - 177
62	Results of feeding experiment conducted with PDP, PFP and fresh clam meat on <u>P. indicus</u> for 100 days.	178 - 179
62(A)	Analysis of variance of the data obtained by PDP, PFP and fresh clam meat.	178 - 179
I	Some raw materials and their composition, used for compoundings feeds.	197 - 198
