

BIBLIOGRAPHY

MAJUMDAR, P., PRASAD, S., and SINGH, N.

1. Sur la valeur asymptotique d'une classe des integrales definies, Acad. Serbe Sci. Publ. Inst. Math. 7(1954), 31-34.
2. Sur l'integrabilite de certaines series trigonometriques, ibid 8(1955), 67-84.

MAJUMDAR, P.

1.  $L^p$  behaviour of power series with positive coefficients, Proc. Amer. Math. Soc. 19(1968), 303-305.

MAJUMDAR, P. and DAI, H. L. Jr.

1. Fourier coefficients of positive functions, Studia, 100(1967), 373-379.
2. Some integrability theorems for power series with positive coefficients, U.T. Technical Summary Report 650(1964) (Madison).

MAJUMDAR, P. and DAI, H. L. Jr.

1. Some elementary integrability theorems for special transforms, J. Analyse Math. 23(1973), 87-88.

MAJUMDAR, P. and DAI, H. L. Jr.

1. Integrability theorems for Fourier series, Duke Math. J. 33(1966), 223-228.

BD/L. V.P. Jr.

1. Integrability of trigonometric series(III), Quart. J. Math. Oxford series, (2) 3 (1952), 217-221.
2. Quasi-positive sequences and trigonometric series, Proc. London Math. Soc. (3) 14(1965), 33-46.
3. Integrability Theorems for Trigonometric Transforms, Springer-Verlag (Berlin), 1967.
4. Fourier series with positive coefficients, J. Math. Anal. Appl. 17(1967), 463-463.
5. The Jensen-Steffensen inequality, Publ. Elektroh. Fak. Univ. Beograd. Ser. Mat. Fiz., No. 50(1970), 1-8.
6. The integrability class of the sin transform of a monotonic function, Studia Math. LIV (1972), 366-369.

BD/L. V.P. and J.G. ...

1. Integrability theorems for Laplace- Stieltjes transforms, J. London Math. Soc., 39(1967), 43-53.

BD/L. V.P.

1. On the integrability of functions defined by trigonometric series, Math. 66(1956), 9-12.
2. Some asymptotic properties of Fourier constants and integrability theorem., ibid 67(1957), 227-244.
3. Some further asymptotic properties of Fourier constants, ibid 69(1958), 175-177.

CHEN, Y.T.

4. Integrability of power series, Arch. Math. (Basel), 10(1950), 180-191.

CHIRILUS, V.A., and TASCANU, V.

1. An exact interpolation theorem, Publ. Inst. Math. Acad. R.S.R. 106(1966), 286-288.

LI CHEN, C.

1. On the Parseval formulae for monotonic functions Proc. Cambridge Phil. Soc. 46(1950), 231-248.

LAURE, G.H., HILBERT, J.E. on POLYA, G.

1. Inequalities, Cambridge Univ. Press (1964).

HEWITT, A. Y.

1. Integrability theorems for Fourier series and Parseval's formulae, J. Math. Anal. Appl. 33(1971), 544-561.
2.  $\omega$ -quasimonotone sequences and sine series ibid 37(1972), 436-441.

MAZUR, E.

1. Integrability theorems for power series and Laplace transforms (I), J. London Math. Soc. 30(1955), 309-317.
2. Integrability theorems for power series and Laplace transforms (II), ibid 32(1957), 99-107.

IGARI, S.

1. Some integrability theorems of trigonometric series and monotone decreasing functions, Tohoku Math. J. 12(1964), 139-146.

RAMI, S. and RAMI, S.

1. On some inequalities for Fourier series,  
J. Analyse Math. 21(1968), 277-291.

JAIN, P.

1. On Fourier coefficients with positive functions, Proc. Indian Sci. Congress Part III (1973), p.6
2. An integrability theorem for Power series,  
Publ. Math. (Debrecen) 20(1973) (to appear).
3. On the integrability of power series,  
Proc. Amer. Math. Soc. (to appear).

KARAPETI, J.

1. Sur un mode de croissance reguliere, Bull. Soc. Math. France 61(1933), 55-62.

ALLENBY, P. J.

1. General integrability theorems for power series, J. London Math. Soc. 32(1957), 58-62.

AMIN, E. A.

1. Integrability of trigonometric series,  
Rend. Istit. (3-4) 1(1968), 371-383.
2. On power series with positive coefficients,  
Acta Sci. Math. 33(1969), 255-257.
3. On certain problems in the theory of integrability of trigonometric series,  
M. Ph. Thesis., Aligarh Muslim University, (1969).

ORYOSHIKOV, I. A.

1. Best approximation by trigonometric polynomials and Fourier coefficients. Mat. sb. 44(86), (1956), 83-84.

LEVIN, L. L.

1. Note on power series with positive coefficients. Acta Sci. Math. 23(1939), 269-282.

LEVIN, L. L. (continued)

1. On Fourier coefficients of positive functions, Notices Amer. Math. Soc. 16(1969), p.1050.
2. Some integrability theorems for Dirichlet's series with positive coefficients, ibid 16(1969), p. 373.

LEVIN, L. L. (cont.)

1. On integrability theorems for power series, Quart. J. Math. (Oxford series) (2) 15(1964), 355-361.

PIERSONIC, D. S.

1. Analytic Inequalities, Springer-Verlag, (Berlin) 1970.

SHANLHAN, H. P.

1. On generalization of Hardy's inequality, J. London Math. Soc., 7(1972), 206-214.

ROBERTSON, M. I.

1. Integrability of trigonometric series II, Math. Z. 84(1964), 62-67.

Articles.

1. A note on quasi-monotone series, Math. Student. 15(1947), 19-24.
2. Trigonometric series with quasi-monotone coefficients, Proc. Amer. Math. Soc. 13(1960), 266-273.

Articles, I. G.

1. Integrability of Trigonometric series, J. Math. (Tokyo) 1(1953), 99-103.

Articles, O.

1. Quasi-monotone series, Amer. J. Math. 73(1951), 203-208.

Articles, H.

1. Series et integrales de Fourier des fonctions monotones non-bornees, Acta Sci. Math. 13(1949), 118-125.

Books, I. G.

1. Theory of Functions. Oxford Univ. Press(1933) Second ed.

Articles, H. G.

1. Positive coefficient elements of Hardy-Orlicz spaces, Colloq. Math. 21(1970), 103-110.

Books, S. G.

1. Integrability theorem of certain trigonometric series with quasi monotone coefficients, Onatah Math. 6(1965), 441-450.

LOW, C. H.

2. Integrability theorems of power of trigonometric series with quasi-monotone coefficients, Math. Z. 31(1968), 809-833.

LYCHNER, A.

1. Trigonometric Series vol. I and II (combined) Cambridge University Press (1968).
