

we give a fairly extensive bibliography of various publications which have been referred to in the present thesis.

It may be mentioned here that the major portion of this thesis, presented in the form of papers, has been communicated for publication in various international mathematical journals. Two of them have already been accepted for publication in "Proceedings of the American Mathematical Society" and "Publications Mathematiques 50 (1973)".

It is with deep sense of gratitude that I take this opportunity of acknowledging my indebtedness to Professor S.N. Singh, for his most valuable guidance, kind advice and very generous encouragement throughout the preparation of this thesis.

I thank Professor M.I. Husain, Head of the Department of Mathematics and Statistics, Aligarh Muslim University, Aligarh, for providing me necessary seminar facilities.

I am also grateful <sup>to</sup> the Council of Scientific and Industrial Research, Government of India, New Delhi, for awarding me a Junior Research Fellowship from 15th September, 1969 to 14th December, 1972 and a Senior Research Fellowship from 15th December, 1972.
