Preface	... i
List of research publications	... vi
 <b>Chapter-1: Introduction</b>	
1.1 Nanomaterials	... 1
1.1.1 Nanoscience and nanotechnology	... 3
1.1.2 Physics of Nanoparticles	... 4
1.1.3 Applications of Nanomaterials	... 8
1.2 Why Zinc Oxide (ZnO)?	... 11
1.2.1 Applications of nano ZnO	... 12
1.2.2 Unique properties of ZnO	... 12
1.2.3 Defects and luminescence in ZnO	... 17
1.2.4 Review of literature	... 19
1.3 Luminescence	... 24
1.3.1 Physical aspects of Photoluminescence (PL)	... 25
1.3.2 Excitons	... 26
1.3.3 Radiative and non-radiative recombination	... 29
1.3.4 Nanophosphors	... 31
1.3.5 Thermoluminescence (TL)	... 32
1.3.6 Theory of thermoluminescence	... 34
1.3.7 Analysis of TL glow curves	... 36
1.3.8 Dosimetric aspects of thermoluminescence	... 38
1.4 Electron paramagnetic resonance (EPR)	... 39
1.4.1 Hyperfine coupling and 'g' Anisotropy	... 42
1.4.2 Calculation of spin concentration (N)	... 44
1.4.3 Calculation of paramagnetic susceptibility ( $\chi$ ) from EPR data	... 44
1.5 Objectives and scope of present work	... 45
1.6 References	... 47
 <b>Chapter-2: Experimental - Synthesis and characterization techniques</b>	
2.1 Synthesis of nanoparticles	... 53
2.2 Solution combustion synthesis (SCS) method	... 55
2.2.1 Preparation of oxalyl dihydrazide fuel	... 56
2.2.2 Stoichiometric calculation	... 56
2.3 Hydrothermal synthesis	... 58

2.4	Characterization techniques	...	59
2.4.1	Powder X-ray diffractometry (PXRD)	...	59
2.4.1.1	Estimation of crystallite size and microstrain from PXRD profiles	...	61
2.4.1.2	Rietveld analysis	...	62
2.4.2	Scanning electron microscopy (SEM)	...	63
2.4.2.1	Energy dispersive X-ray spectroscopy (EDS or EDAX)	...	66
2.4.3	Transmission electron microscopy (TEM)	...	66
2.4.4	Fourier transform infrared spectroscopy (FTIR)	...	67
2.4.4.1	Sample preparation for solids and working principle	...	68
2.4.5	Raman spectroscopy	...	69
2.4.6	UV-Visible spectroscopy	...	70
2.4.6.1	Determination of band gap energy ( $E_g$ )	...	71
2.4.7	Photoluminescence (PL) spectroscopy	...	71
2.4.8	Thermoluminescence (TL) reader	...	73
2.4.9	Electron paramagnetic resonance EPR spectrometer	...	74
2.5	References	...	77

### **Chapter-3: Structural, luminescence and EPR studies of pure ZnO nanoparticles**

3.1	Introduction	...	79
3.2	Combustion derived pure ZnO nanoparticles	...	79
3.2.1	Combustion synthesis	...	79
3.2.2	Powder X-ray diffraction (PXRD) analysis	...	81
3.2.3	Scanning electron microscopy (SEM)	...	86
3.2.4	Transmission electron microscopy (TEM)	...	88
3.2.5	Fourier transform infrared spectroscopy (FTIR)	...	88
3.2.6	Raman spectroscopy	...	89
3.2.7	UV-Visible absorption spectrum and energy gap	...	90
3.2.8	Photoluminescence (PL) studies	...	92
3.2.9	Thermoluminescence (TL) studies	...	94
3.2.10	Electron paramagnetic resonance (EPR) studies	...	97
3.3	Hydrothermally derived pure ZnO nanoparticles	...	100
3.3.1	Hydrothermal synthesis	...	100
3.3.2	Powder X-ray diffraction analysis	...	101
3.3.3	Scanning electron microscopy (SEM)	...	103
3.3.4	Fourier transform infrared spectroscopy (FTIR)	...	108
3.3.5	Photoluminescence (PL) studies	...	109

	3.3.6	Thermoluminescence (TL) studies	...	110
	3.3.7	Electron paramagnetic resonance (EPR) studies	...	113
3.4		References	...	114

**Chapter- 4: Structural, luminescence and EPR studies of transition metal (Cu, Mn) doped ZnO nanoparticles**

4.1		Introduction	...	116
4.2		Results and discussion	...	117
	4.2.1	Combustion synthesis	...	117
	4.2.2	Powder X-ray diffraction (PXRD) analysis	...	117
	4.2.3	Scanning electron microscopy (SEM)	...	122
	4.2.4	Transmission electron microscopy (TEM)	...	122
	4.2.5	Fourier transform infrared spectroscopy (FTIR)	...	125
	4.2.6	UV-Visible absorption spectrum and energy gap	...	126
	4.2.7	Photoluminescence (PL) study	...	128
	4.2.8	Electron paramagnetic resonance (EPR) study	...	132
4.3		References	...	136

**Chapter- 5: Structural, EPR, photo and thermoluminescence properties of Fe doped ZnO nanoparticles**

5.1		Introduction	...	138
5.2		Synthesis	...	139
5.3		Results and discussion	...	139
	5.3.1	Powder X-ray diffraction (PXRD)	...	139
	5.3.2	Microstructure (SEM and TEM)	...	144
	5.3.3	Fourier transform infrared spectroscopy (FTIR)	...	146
	5.3.4	Raman spectroscopy	...	147
	5.3.5	UV-Visible absorption spectrum and energy gap	...	149
	5.3.6	Electron paramagnetic resonance (EPR) studies	...	151
	5.3.7	Photoluminescence (PL) studies	...	153
	5.3.8	Thermoluminescence (TL) studies	...	154
5.4		References	...	158

**Chapter- 6: Structural, luminescence and EPR studies of rare earth elements (Eu, Gd) doped ZnO nanoparticles**

6.1		Introduction	...	160
6.2		Results and discussion of Eu doped ZnO nanoparticles	...	161
	6.2.1	Combustion synthesis	...	161
	6.2.2	Powder X-ray diffraction (PXRD) analysis	...	163
	6.2.3	Scanning and Transmission electron microscopy	...	165

6.2.4	UV-Visible absorption and band gap measurements	...	167
6.2.5	Photoluminescence (PL) studies	...	168
6.2.6	Electron paramagnetic resonance (EPR) studies	...	170
6.2.7	Thermoluminescence (TL) studies	...	171
6.3	Results and discussion of Gd doped ZnO nanoparticles	...	177
6.3.1	Introduction and Combustion synthesis	...	177
6.3.2	Powder X-ray diffraction (PXRD) analysis	...	178
6.3.3	Microstructure: Scanning and Transmission electron microscopy	...	180
6.3.4	Photoluminescence (PL) studies	...	182
6.3.5	Thermoluminescence (TL) studies	...	185
6.3.6	Electron paramagnetic resonance (EPR) studies	...	188
6.4	References	...	191

### **Chapter- 7: Summary and conclusions**

7.1	Summary	...	193
7.2	Scope for further work	...	198

### **Reprints of research publications**
