Acknowledgements

Success is a journey and not a destination it’s said. My journey during the last four years of research life, despite the stresses & strains, has been truly memorable, satisfying & incredibly educative. Such an accomplishment has become possible largely due to the generous help I received directly or indirectly from many people and it’s my privilege to earnestly thank all of them.

At the outset, I wish to express my sincere gratitude to my Research Supervisor Dr. K. Rukmani for introducing me to glassy chalcogenides and guidance to pursue my research interests in this exhilarating field. Her encouragement and support have been truly inspirational to me. She actually instilled in me, the spirit to challenge the limits and not to limit the challenges. This spirit had an empowering influence on this thesis work.

I’m really short of words to express the genuineness of my gratitude to Prof. S. Asokan, Department of Instrumentation and Applied Physics, Indian Institute of Science, Bangalore for allowing me to work in his lab and to use the facilities. Without his support & advice, this thesis wouldn’t have been possible. I remain extremely grateful to him.

I honestly thank Ex-chairpersons of the department, Dr. Ramani madam, Dr. Kagali sir and the present chairman Dr. Anavekar sir, for their encouragement and support and for permitting me to go to Indian Institute of Science to carry out my experiments.

I also thank all other professors of the department for their unremitting encouragement.
I wish to thank all the in-charge professors and operators at the Department of Physics, MRC, and SID of IISc for providing me the opportunities to utilize the XRD, SEM and IR facilities.

I’ll be failing in my duty if I don’t express my gratitude to the education attaché S.K. Dey and the ambassador of Indian High Commission in Bangladesh, for inviting me to pursue this course in India. I am very much thankful to Indian Council for Cultural Relations (ICCR), Ministry of External Affairs, Govt. of India for providing me the Commonwealth Scholarship Scheme for doing this Ph.D. course.

My stay here became a wonderful experience due to the presence of many big hearted people around me both in the IISc lab and in the department. First among them is Mr. Pulok Puttanayak who was very kind & helpful to me. I treasure forever, the friendly company I found in my present & ex-labmates that encompasses H.B. Bhanu Prasanth, B.H. Sharmila, Anbu, Madhav, Aashia, Sumeet, Chandashree, Srinivas, Tamilarasan, Arunbabu, Guruprasad, Madhu, Lokesh, Deepthi madam, Lakshmi, Sreevidya, Shivananju, Vijaya madam, Rajam madam, Satyajith and Raghu.

I especially thank Pulok, Anbu & Lokesh, Mr. Madhu, Srinivas, Rakesh who offered unstinting help in a variety of ways and capacities during all the critical moments of my work in the lab.

My heartfelt thanks to Mr. SriPrakash, K.N.N. Prasad, Ravi Kolarkar and other colleagues at the Department of Physics for their unconditional support, cooperation and encouragement which provided me mental strength to stay in India during my Ph.D. life.

It gives me a great deal of pleasure and satisfaction, in being able to acknowledge through this medium, the support and cooperation of my family & relatives. I sincerely thank my parents who greatly compromised on all fronts and are still encouraging me to accomplish my ambitions. Back in my city Dhaka, my younger brother & elder sister took total care of my parents during the entire period of my doctoral study in India and this was indeed a genuine source of strength and support for me. I really owe them a lot.
I express my sincere thanks to J.W. Lobo (ex-director), Mrs. Sarala Unnikrishnan (present director), P. Venugopal sir and all other members of ICCR-Bangalore, for their co-operation and support in all types of official formalities and their conduct with a foreign national. Especially Mrs. Sarala Unnikrishnan and P. Venugopal sir, they played the role of a parent during my staying in Bangalore. I am ever grateful to them.

It is indeed the right time to dutifully thank all my teachers from dept. of Physics Jahangirnagar University, Dhaka, Bangladesh; Prof. Rabindra Chandra Sinha, Dr. Abdul Mannan Chowdhury, Prof. Salimullah sir, Dr. Salahuddin sir, Jahirul Islam sir, Prof. Abdul Malek (Dept. of Mathematics) who encouraged me to come to India and pursue a Ph.D.

Finally & most importantly, I heartily acknowledge the entire community of my student-friends of Jahangirnagar University. They have been exceptionally inspirational to me in many ways. Their Constructive feedback in particular, has left a long-lasting influence on my Self-belief, Abilities & Dreams. Many thanks to them, for having kept me Going & Young.

Mohammad Mahbubur Rahman
